LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to identify a keyboard, mouse and microphone as input devices and match them to a task. They will also learn to match connected devices to a purpose and explain that connections must be handled with permission. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Present one unfamiliar task and ask pupils to choose an input device with a reason. Check that pupils choose a useful pair and ask an adult before moving a cable. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	7 September 2026	By the end of this lesson, students will be able to identify a keyboard, mouse and microphone as input devices and match them to a task.	**H:** Ask how a computer knows which letter or picture we want. **ID:** Explain input as information or instructions we give a computer; compare it with output from the previous lesson. **WD:** Type a letter, move a pointer and demonstrate a microphone using a prepared non-personal sound. **YD:** Pupils match input devices to typing a name, selecting a picture and recording a sound; practise one safe input action. **C:** Present one unfamiliar task and ask pupils to choose an input device with a reason.	**Support:** Use labelled device pictures, a word bank and a paired demonstration. Accept pointing and an oral explanation before writing. **Extension:** Ask pupils to compare two suitable choices and explain which is more useful for a particular task.
2	10 September 2026	By the end of this lesson, students will be able to match connected devices to a purpose and explain that connections must be handled with permission.	**H:** Show a computer beside a printer and ask how a picture could reach the paper. **ID:** Explain that devices	**Support:** Use labelled device pictures, a word bank and a paired demonstration. Accept pointing and an oral explanation before writing.

			can work together through a cable or a wireless connection; show examples without changing classroom settings. **WD:** Use a prepared computer-and-printer diagram to trace the information path; show a safe connected headset. **YD:** Pupils join picture cards with drawn lines to make useful device pairs and explain one connection. **C:** Check that pupils choose a useful pair and ask an adult before moving a cable.	**Extension:** Ask pupils to compare two suitable choices and explain which is more useful for a particular task.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 2 printed pages 10-13
- Teacher computer and display
- Classroom computers or laptops and the class save folder
- Prepared picture cards, vocabulary prompts or task sheet
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
