LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to choose the actions needed to complete a simple task. They will also learn to arrange a short sequence correctly and predict its result. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Ask pupils to explain why one action belongs in their plan. Check the starting action, order and whether the prediction matches the test. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	11 January 2027	By the end of this lesson, students will be able to choose the actions needed to complete a simple task.	**H:** Ask what a frog would need to do to reach a lily pad. **ID:** Introduce Unit 3 Making a good plan and distinguish useful actions from unrelated ones. **WD:** Choose start, hop and stop cards for a short frog route and explain each choice. **YD:** Pupils select action cards for a frog route and remove cards that do not help. **C:** Ask pupils to explain why one action belongs in their plan.	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to predict the result of one changed block and explain the outcome after testing.
2	14 January 2027	By the end of this lesson, students will be able to arrange a short sequence correctly and predict its result.	**H:** Show a frog plan with the stop card before the hop card. **ID:** Explain that the same actions can give a different result when their order changes. **WD:** Act out a correct route, swap two cards and compare what happens.	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to predict the result of one changed block and explain the outcome after testing.

			YD: Pairs order four action cards, predict the finish and test the route with a paper frog. **C:** Check the starting action, order and whether the prediction matches the test.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 2 printed pages 36-41
- Teacher computer and display
- Scratch 3, school-managed access or offline editor, and a class save folder
- Movement cards, block cards and the named starter project where required
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
