LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to plan a simple Frog Hop Game using a start, movement and finish. They will also learn to run a short program and compare its behaviour with the plan. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the starting point, useful action sequence and clear finish in each plan. Ask pupils to explain what happened, what should happen and the change they tested. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	25 January 2027	By the end of this lesson, students will be able to plan a simple Frog Hop Game using a start, movement and finish.	**H:** Show a teacher-prepared frog-and-lily-pad scene. **ID:** Use the book's Frog Hop Game to identify the player action and a clear goal; keep the first version small. **WD:** Draw the starting position and target, then write or draw the actions needed to reach it. **YD:** Pupils make a storyboard and algorithm for one frog route, checking that the player can understand the goal. **C:** Check the starting point, useful action sequence and clear finish in each plan.	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to predict the result of one changed block and explain the outcome after testing.
2	28 January 2027	By the end of this lesson, students will be able to run a short program and compare its behaviour with the plan.	**H:** Ask whether a program will always do what its creator hoped. **ID:** Explain running, observing and checking against the algorithm; treat errors as information for improvement.	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to predict the result of one changed block and explain the

			WD: Run a prepared frog sequence, compare it with the plan and change one incorrect movement block. **YD:** Pupils run a short sequence, record whether the frog reaches the target and correct one mismatch. **C:** Ask pupils to explain what happened, what should happen and the change they tested.	outcome after testing.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 2 printed pages 46-49
- Teacher computer and display
- Scratch 3, school-managed access or offline editor, and a class save folder
- Movement cards, block cards and the named starter project where required
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
