LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to create, follow and check an ordered algorithm for a simple game action. They will also learn to choose a suitable sprite and backdrop for a simple Frog Hop Game. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Record pupils' sequencing, plan-to-program matching and explanation of a correction. Check sprite and backdrop choices and ask pupils to show the player goal. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	1 February 2027	By the end of this lesson, students will be able to create, follow and check an ordered algorithm for a simple game action.	**H:** Revisit start, action and finish cards from Unit 3. **ID:** Explain the learning check: plan a route, match it to a short program and compare the result. **WD:** Demonstrate how to record a prediction using a different route from the check. **YD:** Pupils complete a short picture algorithm, build or select matching blocks and test their prediction. **C:** Record pupils' sequencing, plan-to-program matching and explanation of a correction.	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to predict the result of one changed block and explain the outcome after testing.
2	4 February 2027	By the end of this lesson, students will be able to choose a suitable sprite and backdrop for a simple Frog Hop Game.	**H:** Show different sprite choices and ask which fits the planned frog game. **ID:** Introduce Unit 4 The Frog Hop Game and review the agreed start, movement and finish. **WD:** Choose a frog sprite	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to predict the result of one changed block and explain the outcome after testing.

			and suitable backdrop, remove an unwanted sprite and save the project. **YD:** Pupils create the stage for their planned game and name the saved project clearly. **C:** Check sprite and backdrop choices and ask pupils to show the player goal.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 2 printed pages 50-55
- Teacher computer and display
- Scratch 3, school-managed access or offline editor, and a class save folder
- Movement cards, block cards and the named starter project where required
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
