LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to use a forever loop to repeat an action and explain how to stop the program. They will also learn to combine a start event and movement commands to make a small playable Frog Hop Game. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Ask pupils to identify the repeated blocks and demonstrate stopping the program safely. Check the agreed success criteria and ask each pupil to explain one block's purpose. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	8 March 2027	By the end of this lesson, students will be able to use a forever loop to repeat an action and explain how to stop the program.	**H:** Ask how to make a small action happen again without adding many copies. **ID:** Explain that forever repeats the blocks inside it while the program runs. **WD:** Place a small movement and wait block inside forever; run it, observe the repetition and use the red stop button. **YD:** Pupils build and test a short repeated frog action, adjusting movement to remain manageable. **C:** Ask pupils to identify the repeated blocks and demonstrate stopping the program safely.	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to predict the result of one changed block and explain the outcome after testing.
2	11 March 2027	By the end of this lesson, students will be able to combine a start event and movement commands to make a small playable Frog Hop Game.	**H:** Revisit the plan and ask which parts are already working. **ID:** Explain the success criteria: clear goal, working start, suitable movement and a saved project.	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to predict the result of one changed block and explain the

			WD: Combine a short event-driven sequence and a suitable loop, then test one complete play attempt. **YD:** Pupils build their small game from the plan, test with a partner and correct one problem. **C:** Check the agreed success criteria and ask each pupil to explain one block's purpose.	outcome after testing.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 2 printed pages 60-63
- Teacher computer and display
- Scratch 3, school-managed access or offline editor, and a class save folder
- Movement cards, block cards and the named starter project where required
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
