LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will practise the taught knowledge and skills in start events, movement, forever loops and the small Frog Hop Game developed so far. They will complete a mock assessment, review feedback and correct misunderstandings before assessment week.

End-of-Week Assessment/Check: How will you know they got it?

Compare the mock task with each pupil's corrected work and similar follow-up task. Check that pupils can explain a correction and apply it independently. Record any outcome that needs another guided example.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	15 March 2027	By the end of this lesson, students will be able to complete a mock assessment and identify a skill to practise in start events, movement, forever loops and the small Frog Hop Game developed so far.	**H:** Invite pupils to recall the recent unit using familiar picture or block prompts. **ID:** Explain that the mock is practice and covers only the skills already taught. Use a short mix of pictures, explanations and practical actions. **WD:** Model the response format with an unrelated example, including how to show a useful explanation. **YD:** Pupils complete the prepared mock tasks independently before checking with the teacher; record one secure skill and one practice target. **C:** Collect evidence and choose common misunderstandings for the review lesson rather than moving to new content.	**Support:** Read instructions aloud without supplying answers, use familiar picture vocabulary and allow an oral response where appropriate. **Extension:** Ask pupils to explain the reason for a correction and create a similar example for a partner.
2	18 March 2027	By the end of this lesson, students will be able to correct a misunderstanding and improve a task related to start events, movement,	**H:** Use an anonymous example from the mock and invite a kind suggestion for improvement.	**Support:** Read instructions aloud without supplying answers, use familiar picture vocabulary and allow an oral response where appropriate.

		forever loops and the small Frog Hop Game developed so far.	**ID:** Revisit the most common errors and explain why the correct approach works. **WD:** Model correcting one mistake, then check the improved result using a practical demonstration or a clear reason. **YD:** Pupils correct their own work and complete a short similar task; offer targeted support to pupils with the same misconception. **C:** Ask pupils to explain their correction and record who needs another guided example before assessment.	**Extension:** Ask pupils to explain the reason for a correction and create a similar example for a partner.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 2 printed pages 52-63
- Teacher computer and display
- Scratch 3, school-managed access or offline editor, and a class save folder
- Prepared mock assessment tasks covering the stated outcomes
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Teacher observation checklist and school access arrangements

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
