LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to find and correct a fault in a familiar Scratch game using the plan as a guide. They will also learn to demonstrate a working Scratch game and explain its start event and repeated action. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Ask pupils to demonstrate the fault, the correction and a successful retest. Record practical independence, explanation of blocks and evidence of testing. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	29 March 2027	By the end of this lesson, students will be able to find and correct a fault in a familiar Scratch game using the plan as a guide.	**H:** Show a frog game that starts in the wrong position. **ID:** Explain the find-and-fix routine: describe the problem, predict a cause, change one thing and retest. **WD:** Correct the starting-position block, restart twice and compare the result with the plan. **YD:** Pupils debug a prepared fault or a fault in their own Frog Hop Game and record the change with a drawing or short note. **C:** Ask pupils to demonstrate the fault, the correction and a successful retest.	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to predict the result of one changed block and explain the outcome after testing.
2	1 April 2027	By the end of this lesson, students will be able to demonstrate a working Scratch game and explain its start event and repeated action.	**H:** Invite pupils to recall a change that improved the Frog Hop Game. **ID:** Explain the practical showcase: demonstrate the goal, restart the game	**Support:** Provide large block cards or a short starter script and model one step at a time. Let pupils explain with pictures before typing. **Extension:** Ask pupils to

			and identify useful blocks. **WD:** Model giving kind feedback about one working feature and one small improvement. **YD:** Pairs demonstrate their games, explain a start event or loop, and apply one manageable improvement. **C:** Record practical independence, explanation of blocks and evidence of testing.	predict the result of one changed block and explain the outcome after testing.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 2 printed pages 64-66
- Teacher computer and display
- Scratch 3, school-managed access or offline editor, and a class save folder
- Movement cards, block cards and the named starter project where required
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
