LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to build a click-to-catch butterfly game using events and changing position. They will also learn to test, improve and explain a click-to-catch game. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check that the green flag starts a visible butterfly and that clicking changes its position. Ask pupils to show a tested improvement and explain which event makes the butterfly move. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	19 April 2027	By the end of this lesson, students will be able to build a click-to-catch butterfly game using events and changing position.	**H:** Play a simple teacher example and ask what makes the butterfly appear to escape. **ID:** Explain the small game goal: click the butterfly and watch it move to a new place; scoring is an optional extension. **WD:** Choose a butterfly sprite. Under when green flag clicked add show and go to random position. Under when this sprite clicked add a short sound and go to random position. **YD:** Pupils build the two scripts, choose a backdrop and test whether each click moves the butterfly; save their game. **C:** Check that the green flag starts a visible butterfly and that clicking changes its position.	**Support:** Provide the named starter and a short picture checklist. Keep one working interaction as the goal and pair pupils for reading and testing. **Extension:** Ask pupils to improve instructions or add one small feature only after the core game works and has been tested.
2	22 April 2027	By the end of this lesson, students will be able to	**H:** Ask a partner to play the saved butterfly game	**Support:** Provide the named starter and a short picture

		test, improve and explain a click-to-catch game.	without an explanation. **ID:** Review visible sprites, useful instructions, a working click event and a reliable restart. **WD:** Model adding a short instruction using a say block at the start and checking that it does not block play for too long. **YD:** Pupils run a three-point test, correct one issue and personalise the backdrop or sound; confident pupils may add a teacher-guided score. **C:** Ask pupils to show a tested improvement and explain which event makes the butterfly move.	checklist. Keep one working interaction as the goal and pair pupils for reading and testing. **Extension:** Ask pupils to improve instructions or add one small feature only after the core game works and has been tested.

MATERIALS NEEDED FOR THE WEEK

- Teacher-designed Scratch game; related skills in Student Book 2 Units 3-4
- Teacher computer and display
- Scratch 3, school-managed access or offline editor, and a class save folder
- Movement cards, block cards and the named starter project where required
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
