LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to control a sprite with arrow keys to follow a simple treasure route. They will also learn to add a clear finish response and test a treasure-route game. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check that the chosen controls move in the intended direction and the green flag resets the player. Check the start, movement and finish response and ask pupils to explain how they tested the game. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	26 April 2027	By the end of this lesson, students will be able to control a sprite with arrow keys to follow a simple treasure route.	**H:** Show a treasure map and ask how a player could guide a character to the goal. **ID:** Explain that each arrow key can trigger a short movement; use a wide route with few turns. **WD:** Set a starting position with the green flag. Model when right arrow key pressed change x by 10 and corresponding left, up and down commands; provide a prepared reset script if walls are used. **YD:** Pupils create a short route, add movement controls and test reaching the treasure from the starting point. **C:** Check that the chosen controls move in the intended direction and the green flag resets the player.	**Support:** Provide the named starter and a short picture checklist. Keep one working interaction as the goal and pair pupils for reading and testing. **Extension:** Ask pupils to improve instructions or add one small feature only after the core game works and has been tested.
2	29 April 2027	By the end of this lesson, students will be able to	**H:** Ask how a player knows that the treasure	**Support:** Provide the named starter and a short picture

		add a clear finish response and test a treasure-route game.	has been found. **ID:** Introduce one simple finish check with teacher support; use a prepared sensing script so the focus stays on a working route. **WD:** Model a forever check that says Treasure found when the player touches the treasure sprite, then stops the game. **YD:** Pupils connect or complete the prepared finish check, ask a partner to test the route and improve one difficult turn. **C:** Check the start, movement and finish response and ask pupils to explain how they tested the game.	checklist. Keep one working interaction as the goal and pair pupils for reading and testing. **Extension:** Ask pupils to improve instructions or add one small feature only after the core game works and has been tested.

MATERIALS NEEDED FOR THE WEEK

- Teacher-designed Scratch game; related skills in Student Book 2 Units 3-4
- Teacher computer and display
- Scratch 3, school-managed access or offline editor, and a class save folder
- Movement cards, block cards and the named starter project where required
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
