LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to create a short animal question with a typed answer and clear feedback. They will also learn to complete a short animal quiz and test its questions and feedback. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Ask pupils to show both feedback paths and identify where the player's answer is checked. Check every question and ask pupils to explain one test that helped them find an error. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	10 May 2027	By the end of this lesson, students will be able to create a short animal question with a typed answer and clear feedback.	**H:** Ask which animal says meow and compare two possible answers. **ID:** Explain ask and wait, the answer reporter and a simple if/else check. Supply a partly completed script to keep the task manageable. **WD:** Model asking Which animal says meow, checking whether answer equals cat, and displaying a correct or try-again response. **YD:** Pupils complete one animal question, test a correct and an incorrect answer and save the quiz. **C:** Ask pupils to show both feedback paths and identify where the player's answer is checked.	**Support:** Provide the named starter and a short picture checklist. Keep one working interaction as the goal and pair pupils for reading and testing. **Extension:** Ask pupils to improve instructions or add one small feature only after the core game works and has been tested.
2	13 May 2027	By the end of this lesson, students will be able to complete a short animal quiz and test its questions and feedback.	**H:** Invite a partner to try the first question without help. **ID:** Review clear questions, simple expected answers and a	**Support:** Provide the named starter and a short picture checklist. Keep one working interaction as the goal and pair pupils for reading and testing.

			green-flag restart; keep the quiz to two or three questions. **WD:** Duplicate a question section, change its animal and expected answer, and test that the new feedback matches it. **YD:** Pupils complete and personalise a short quiz, record a correct and incorrect test and repair any copied answer that was not changed. **C:** Check every question and ask pupils to explain one test that helped them find an error.	**Extension:** Ask pupils to improve instructions or add one small feature only after the core game works and has been tested.

MATERIALS NEEDED FOR THE WEEK

- Teacher-designed Scratch game; related skills in Student Book 2 Units 3-4
- Teacher computer and display
- Scratch 3, school-managed access or offline editor, and a class save folder
- Movement cards, block cards and the named starter project where required
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
