LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will practise the taught knowledge and skills in game goals, events, movement, testing, AI examples, learning from examples, mistakes and personal-information protection. They will complete a mock assessment, review feedback and correct misunderstandings before assessment week.

End-of-Week Assessment/Check: How will you know they got it?

Compare the mock task with each pupil's corrected work and similar follow-up task. Check that pupils can explain a correction and apply it independently. Record any outcome that needs another guided example.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	14 June 2027	By the end of this lesson, students will be able to complete a mock assessment and identify a skill to practise in game goals, events, movement, testing, AI examples, learning from examples, mistakes and personal-information protection.	**H:** Invite pupils to recall the recent unit using familiar picture or block prompts. **ID:** Explain that the mock is practice and covers only the skills already taught. Use a short mix of pictures, explanations and practical actions. **WD:** Model the response format with an unrelated example, including how to show a useful explanation. **YD:** Pupils complete the prepared mock tasks independently before checking with the teacher; record one secure skill and one practice target. **C:** Collect evidence and choose common misunderstandings for the review lesson rather than moving to new content.	**Support:** Read instructions aloud without supplying answers, use familiar picture vocabulary and allow an oral response where appropriate. **Extension:** Ask pupils to explain the reason for a correction and create a similar example for a partner.
2	17 June 2027	By the end of this lesson, students will be able to correct a misunderstanding and improve a task related to game goals, events,	**H:** Use an anonymous example from the mock and invite a kind suggestion for improvement.	**Support:** Read instructions aloud without supplying answers, use familiar picture vocabulary and allow an oral response where appropriate.

		movement, testing, AI examples, learning from examples, mistakes and personal-information protection.	**ID:** Revisit the most common errors and explain why the correct approach works. **WD:** Model correcting one mistake, then check the improved result using a practical demonstration or a clear reason. **YD:** Pupils correct their own work and complete a short similar task; offer targeted support to pupils with the same misconception. **C:** Ask pupils to explain their correction and record who needs another guided example before assessment.	**Extension:** Ask pupils to explain the reason for a correction and create a similar example for a partner.

MATERIALS NEEDED FOR THE WEEK

- Saved Scratch games and prepared AI knowledge and practical tasks
- Teacher computer and display
- Scratch 3, class computers, saved projects and printed AI picture cards
- AI4K12 K-2 guidance: https://ai4k12.org/gradeband-progression-charts/
- Whiteboard and markers
- Student notebooks, pencils and colouring materials
- UNICEF AI and children guidance: https://www.unicef.org/innocenti/reports/policy-guidance-ai-children

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
