LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to distinguish system software, utilities and application software. They will also learn to select application software for a task and justify the choice. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check classifications and a functional explanation rather than a product name. Check the tool choice, relevant feature and evidence that the sample meets the brief. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	14 September 2026	By the end of this lesson, students will be able to distinguish system software, utilities and application software.	**H:** Ask what allows a word processor to use a keyboard and printer. **ID:** Explain operating-system functions, utilities and applications using familiar actions. **WD:** Trace opening, editing and saving a document, identifying application and operating-system roles. **YD:** Students classify examples and explain which software handles files, hardware and a user task. **C:** Check classifications and a functional explanation rather than a product name.	**Support:** Provide labelled diagrams, vocabulary and a partly completed comparison table. Model one decision before independent practice. **Extension:** Compare an alternative specification or tool and explain when the recommendation would change.
2	16 September 2026	By the end of this lesson, students will be able to select application software for a task and justify the choice.	**H:** Show a club calculating totals manually in a presentation. **ID:** Compare word processing, spreadsheets, databases, presentations and graphics software.	**Support:** Provide labelled diagrams, vocabulary and a partly completed comparison table. Model one decision before independent practice. **Extension:** Compare an alternative specification or tool and explain when the

			WD: Choose a spreadsheet for a budget and explain how formulas meet the task. **YD:** Students recommend software for a newsletter, stock records and a budget, then create one small sample. **C:** Check the tool choice, relevant feature and evidence that the sample meets the brief.	recommendation would change.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 42-58
- Teacher computer and display
- Classroom computers, school-approved applications and class save folder
- Fictional user briefs, specification sheets and device or network cards
- Whiteboard and markers
- Student notebooks, task sheets and requirements checklists
- Prepared examples and a success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
