LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to explain the roles of RAM, ROM, storage and the processor. They will also learn to justify a computer specification using workload and performance limits. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the distinct roles and correct use of volatile. Check evidence linked to workload and avoid judging performance from clock speed alone. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	21 September 2026	By the end of this lesson, students will be able to explain the roles of RAM, ROM, storage and the processor.	**H:** Ask why unsaved work can disappear while saved files remain. **ID:** Explain volatile working memory, non-volatile memory, storage and executing instructions. **WD:** Trace loading an application into working memory and processing an input. **YD:** Students annotate a computer model and explain what happens to saved and unsaved data when power is lost. **C:** Check the distinct roles and correct use of volatile.	**Support:** Provide labelled diagrams, vocabulary and a partly completed comparison table. Model one decision before independent practice. **Extension:** Compare an alternative specification or tool and explain when the recommendation would change.
2	23 September 2026	By the end of this lesson, students will be able to justify a computer specification using workload and performance limits.	**H:** Compare fictional computers with different RAM, storage and processors. **ID:** Explain workload, processor characteristics, working memory and storage bottlenecks. **WD:** Analyse a video-	**Support:** Provide labelled diagrams, vocabulary and a partly completed comparison table. Model one decision before independent practice. **Extension:** Compare an alternative specification or tool and explain when the recommendation would change.

			editing brief and justify a balanced specification within a budget. **YD:** Pairs recommend a device or upgrade using two specification sheets and acknowledge a limitation. **C:** Check evidence linked to workload and avoid judging performance from clock speed alone.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 59-63
- Teacher computer and display
- Classroom computers, school-approved applications and class save folder
- Fictional user briefs, specification sheets and device or network cards
- Whiteboard and markers
- Student notebooks, task sheets and requirements checklists
- Prepared examples and a success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
