LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to explain how digital devices exchange data in common scenarios. They will also learn to compare wired and wireless connections for a user scenario. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check suitable methods and an accurate distinction between streaming and downloading. Check task-based choices and an accurate wireless limitation. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	28 September 2026	By the end of this lesson, students will be able to explain how digital devices exchange data in common scenarios.	**H:** Ask whether streaming a video is the same as downloading the whole file first. **ID:** Introduce data transfer, streaming, downloading, bandwidth and latency. **WD:** Trace a video call and explain how connection quality affects delay and clarity. **YD:** Students choose communication methods for a live meeting, offline film viewing and sending a document. **C:** Check suitable methods and an accurate distinction between streaming and downloading.	**Support:** Provide labelled diagrams, vocabulary and a partly completed comparison table. Model one decision before independent practice. **Extension:** Compare an alternative specification or tool and explain when the recommendation would change.
2	30 September 2026	By the end of this lesson, students will be able to compare wired and wireless connections for a user scenario.	**H:** Ask why a fixed computer and wearable device may need different connections. **ID:** Compare Ethernet, fibre, Wi-Fi and Bluetooth using range, mobility and	**Support:** Provide labelled diagrams, vocabulary and a partly completed comparison table. Model one decision before independent practice. **Extension:** Compare an alternative specification or tool

			interference. **WD:** Choose a wired link for a workstation and Bluetooth for a nearby peripheral; distinguish Wi-Fi from internet access. **YD:** Students choose connections for four scenarios and justify each with two criteria. **C:** Check task-based choices and an accurate wireless limitation.	and explain when the recommendation would change.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 66-78
- Teacher computer and display
- Classroom computers, school-approved applications and class save folder
- Fictional user briefs, specification sheets and device or network cards
- Whiteboard and markers
- Student notebooks, task sheets and requirements checklists
- Prepared examples and a success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
