LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to identify network types and explain common components. They will also learn to draw and explain a small network that meets a brief. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check roles and correct local and external message paths. Check a coherent diagram, correct roles and two justified choices. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	26 October 2026	By the end of this lesson, students will be able to identify network types and explain common components.	**H:** Compare one office network with connections between offices in different cities. **ID:** Introduce LAN, WAN, clients, servers, switches, routers and wireless access points. **WD:** Trace a local print request and an internet request, distinguishing switching and routing. **YD:** Students label a small network and classify two LAN or WAN scenarios with reasons. **C:** Check roles and correct local and external message paths.	**Support:** Provide a network starter and risk-control cards. Break the brief into requirements, choices and reasons. **Extension:** Evaluate an alternative design and justify an improvement addressing a remaining risk.
2	28 October 2026	By the end of this lesson, students will be able to draw and explain a small network that meets a brief.	**H:** Present a club needing shared files, printing and wireless access. **ID:** Translate requirements into devices, connections and services; compare peer-to-peer and client-server arrangements.	**Support:** Provide a network starter and risk-control cards. Break the brief into requirements, choices and reasons. **Extension:** Evaluate an alternative design and justify an improvement addressing a remaining risk.

			WD: Draw clients, switch, access point, router and shared services, then trace a request. **YD:** Pairs design an office network, label wired and wireless links and justify the arrangement. **C:** Check a coherent diagram, correct roles and two justified choices.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 69-70 and 79-90
- Teacher computer and display
- Classroom computers, school-approved applications and class save folder
- Fictional organisation brief, network starter and risk-control cards
- Whiteboard and markers
- Student notebooks, task sheets and requirements checklists
- Prepared examples and a success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
