## LESSON OVERVIEW

### What should students know/do by the end of this week's lessons?

Students will learn to match connectivity risks to appropriate safeguards. They will also learn to apply safe sharing and account routines in a simulated workplace. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

### End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check three accurate matches and how each control reduces a specific risk. Check intended audience, appropriate access and a reporting action without real credentials. Note pupils who need further guided practice.

## LESSON SLOTS - MONDAY AND WEDNESDAY

| Lesson | Date | Learning Objective | The Lesson Flow | Differentiation |
|---|---|---|---|---|
| 1 | 2 November 2026 | By the end of this lesson, students will be able to match connectivity risks to appropriate safeguards. | **H:** Show a fictional unauthorised connection and ask what could be exposed.<br><br>**ID:** Explain unauthorised access, interception, malware and disruption, linking threats to impacts.<br><br>**WD:** Analyse a network scenario and distinguish authentication, encryption, updates and firewall functions.<br><br>**YD:** Students complete a risk-impact-control table and explain why one control cannot address every risk.<br><br>**C:** Check three accurate matches and how each control reduces a specific risk. | **Support:** Provide a network starter and risk-control cards. Break the brief into requirements, choices and reasons.<br><br>**Extension:** Evaluate an alternative design and justify an improvement addressing a remaining risk. |
| 2 | 4 November 2026 | By the end of this lesson, students will be able to apply safe sharing and account routines in a simulated workplace. | **H:** Display a folder shared with everyone when only two staff need it.<br><br>**ID:** Explain least privilege, strong unique passwords, additional sign-in verification and reporting | **Support:** Provide a network starter and risk-control cards. Break the brief into requirements, choices and reasons.<br><br>**Extension:** Evaluate an alternative design and justify |

## MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 90-93
- Teacher computer and display
- Classroom computers, school-approved applications and class save folder
- Fictional organisation brief, network starter and risk-control cards
- Whiteboard and markers
- Student notebooks, task sheets and requirements checklists
- Prepared examples and a success checklist

## END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
