LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to analyse device and network requirements for a small organisation. They will also learn to justify an integrated solution using function, access, cost and security. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check a traceable match between needs and choices and a sensible follow-up question. Check specific evidence, consistent components and an acknowledged limitation. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	9 November 2026	By the end of this lesson, students will be able to analyse device and network requirements for a small organisation.	**H:** Introduce a fictional community centre with reception, office staff and visiting tutors. **ID:** Separate requirements, constraints and assumptions; revisit devices, storage and connections. **WD:** Extract a requirements table and model one evidence-based hardware choice. **YD:** Groups propose devices and a network, including backup, and identify one missing requirement. **C:** Check a traceable match between needs and choices and a sensible follow-up question.	**Support:** Provide a network starter and risk-control cards. Break the brief into requirements, choices and reasons. **Extension:** Evaluate an alternative design and justify an improvement addressing a remaining risk.
2	11 November 2026	By the end of this lesson, students will be able to justify an integrated solution using function, access, cost and security.	**H:** Ask groups to identify the weakest justification in their proposal. **ID:** Explain justification as a feature linked to a need, benefit and limitation.	**Support:** Provide a network starter and risk-control cards. Break the brief into requirements, choices and reasons. **Extension:** Evaluate an alternative design and justify

			WD: Improve one recommendation and connect backup, permissions and network choices. **YD:** Students revise their proposal and present four justified choices, including accessibility and a safeguard. **C:** Check specific evidence, consistent components and an acknowledged limitation.	an improvement addressing a remaining risk.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 4-63 and 66-93
- Teacher computer and display
- Classroom computers, school-approved applications and class save folder
- Fictional organisation brief, network starter and risk-control cards
- Whiteboard and markers
- Student notebooks, task sheets and requirements checklists
- Prepared examples and a success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
