LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to produce an individual device and network proposal for a new brief. They will also learn to evaluate a solution against user needs and improve a weak choice. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check coverage of user needs and a task-based reason for each major choice. Check a balanced evaluation, concrete revision and readiness for mock assessment. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	16 November 2026	By the end of this lesson, students will be able to produce an individual device and network proposal for a new brief.	**H:** Present a design studio with fixed workstations and visiting clients. **ID:** Review requirements, specifications, peripherals, network, storage, backup and security. **WD:** Model the proposal structure with an unrelated example and label an assumption explicitly. **YD:** Students independently create a concise proposal and labelled diagram using the taught concepts. **C:** Check coverage of user needs and a task-based reason for each major choice.	**Support:** Provide a network starter and risk-control cards. Break the brief into requirements, choices and reasons. **Extension:** Evaluate an alternative design and justify an improvement addressing a remaining risk.
2	18 November 2026	By the end of this lesson, students will be able to evaluate a solution against user needs and improve a weak choice.	**H:** Ask whether an impressive specification automatically meets a user's needs. **ID:** Introduce a requirements checklist and practical or paper checks based on evidence.	**Support:** Provide a network starter and risk-control cards. Break the brief into requirements, choices and reasons. **Extension:** Evaluate an alternative design and justify an improvement addressing a remaining risk.

			WD: Evaluate a connection against mobility, reliability and cost, then justify a revision. **YD:** Students peer-review proposals, record evidence and revise one weak choice with an explanation. **C:** Check a balanced evaluation, concrete revision and readiness for mock assessment.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 4-63 and 66-93
- Teacher computer and display
- Classroom computers, school-approved applications and class save folder
- Fictional organisation brief, network starter and risk-control cards
- Whiteboard and markers
- Student notebooks, task sheets and requirements checklists
- Prepared examples and a success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
