LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will practise the taught knowledge and skills in Units 1–2 digital devices and connectivity, including network design, safeguards and justified user solutions. They will complete a mock assessment, review feedback and correct misunderstandings before assessment week.

End-of-Week Assessment/Check: How will you know they got it?

Compare the mock task with each pupil's corrected work and similar follow-up task. Check that pupils can explain a correction and apply it independently. Record any outcome that needs another guided example.

LESSON SLOTS - MONDAY AND WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	23 November 2026	By the end of this lesson, students will be able to complete a mock assessment of digital devices and connectivity and identify a practice target.	**H:** Retrieve familiar vocabulary using devices, diagrams or short scenarios. **ID:** Explain the taught outcomes and feedback lesson before assessment week. **WD:** Model an unrelated response showing evidence and a reason. **YD:** Students label a network, explain components, match risks to safeguards and justify an integrated solution and outline how they would produce a labelled device and network proposal with backup and access controls, then evaluate it against the brief. Review results and select one target. **C:** Collect mock evidence and identify misconceptions for the next lesson.	**Support:** Use familiar task formats and agreed access support. Target misconceptions during the feedback lesson. **Extension:** Apply a corrected idea to a different brief and explain the reasoning.
2	25 November 2026	By the end of this lesson, students will be able to correct a misconception	**H:** Show an anonymous error and invite a respectful correction.	**Support:** Use familiar task formats and agreed access support. Target

		about digital devices and connectivity and apply the correction to a new task.	**ID:** Revisit the difficulty with familiar examples and criteria. **WD:** Model a correction and explain why it meets the brief. **YD:** Students correct their responses, then produce a labelled device and network proposal with backup and access controls, then evaluate it against the brief in a similar follow-up task. **C:** Ask students to explain the correction and record who needs more guided practice.	misconceptions during the feedback lesson. **Extension:** Apply a corrected idea to a different brief and explain the reasoning.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 4-63, 66-93 and 202-207
- Teacher computer and display
- Classroom computers, school-approved applications and class save folder
- Prepared internal school mock assessment tasks covering the taught outcomes
- Whiteboard and markers
- Student notebooks, task sheets and requirements checklists
- Teacher outcome checklist and agreed school access arrangements

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
