SIAMIS ICT Weekly Lesson Plan

Teacher: Ray Joshua Balingkit | Year 10–11 | Term 1 | Week 10

Year 10 course sequence: Units 1–3. Two 45-minute lessons. Year 11 progression: Units 4–6.

Lesson overview

This week covers system software and utilities and operating systems and office applications.

Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 42-49

End of week assessment

Check accurate terminology, explanations and application through the relevant book activities and questions. Record misconceptions and use the next feedback or consolidation session for corrections. Assess only content already taught.

Lesson 1

System software and utilities

Date: 26 October 2026 | Duration: 45 minutes

Learning objective

By the end of this lesson, students will be able to explain and apply system software and utilities, using accurate textbook terminology and a justified example.

Lesson flow

Hook 5 minutes

Use a short scenario, image or retrieval question to introduce system software and utilities.

Introduce 8 minutes

Teach system software and utilities from printed pages 42-49; include the relevant definitions, diagrams and examples.

We do 10 minutes

Work through a textbook example or comparison for system software and utilities; explain each decision and check understanding.

You do 17 minutes

Complete the relevant textbook activities and questions for system software and utilities. Use a practical demonstration or scenario where appropriate; finish remaining practice as homework.

Check 5 minutes

Explain one key idea about system software and utilities and justify an answer; record misconceptions for the next lesson.

Differentiation

Support: Provide labelled diagrams, vocabulary, a structured response frame and a worked example. Apply agreed access arrangements during independent assessment without supplying answers.

Extension: Justify an alternative solution, explain a limitation or apply the same concept to a new scenario using evidence.

Lesson 2

Operating systems and office applications

Date: 28 October 2026 | Duration: 45 minutes

Learning objective

By the end of this lesson, students will be able to explain and apply operating systems and office applications, using accurate textbook terminology and a justified example.

Lesson flow

Hook 5 minutes

Use a short scenario, image or retrieval question to introduce operating systems and office applications.

Introduce 8 minutes

Teach operating systems and office applications from printed pages 42-49; include the relevant definitions, diagrams and examples.

We do 10 minutes

Work through a textbook example or comparison for operating systems and office applications; explain each decision and check understanding.

You do 17 minutes

Complete the relevant textbook activities and questions for operating systems and office applications. Use a practical demonstration or scenario where appropriate; finish remaining practice as homework.

Check 5 minutes

Explain one key idea about operating systems and office applications and justify an answer; record misconceptions for the next lesson.

Differentiation
