SIAMIS ICT Weekly Lesson Plan

Teacher: Ray Joshua Balingkit | Year 10–11 | Term 1 | Week 13

Year 10 course sequence: Units 1–3. Two 45-minute lessons. Year 11 progression: Units 4–6.

Lesson overview

This week covers digital communication and device connections and network types; data-transfer speed and volume.

Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 66-72

End of week assessment

Check accurate terminology, explanations and application through the relevant book activities and questions. Record misconceptions and use the next feedback or consolidation session for corrections. Assess only content already taught.

Lesson 1

Digital communication and device connections

Date: 16 November 2026 | Duration: 45 minutes

Learning objective

By the end of this lesson, students will be able to explain and apply digital communication and device connections, using accurate textbook terminology and a justified example.

Lesson flow

Hook 5 minutes

Use a short scenario, image or retrieval question to introduce digital communication and device connections.

Introduce 8 minutes

Teach digital communication and device connections from printed pages 66-72; include the relevant definitions, diagrams and examples.

We do 10 minutes

Work through a textbook example or comparison for digital communication and device connections; explain each decision and check understanding.

You do 17 minutes

Complete the relevant textbook activities and questions for digital communication and device connections. Use a practical demonstration or scenario where appropriate; finish remaining practice as homework.

Check 5 minutes

Explain one key idea about digital communication and device connections and justify an answer; record misconceptions for the next lesson.

Differentiation

Support: Provide labelled diagrams, vocabulary, a structured response frame and a worked example. Apply agreed access arrangements during independent assessment without supplying answers.

Extension: Justify an alternative solution, explain a limitation or apply the same concept to a new scenario using evidence.

Lesson 2

Network types; data-transfer speed and volume

Date: 18 November 2026 | Duration: 45 minutes

Learning objective

By the end of this lesson, students will be able to explain and apply network types; data-transfer speed and volume, using accurate textbook terminology and a justified example.

Lesson flow

Hook 5 minutes

Use a short scenario, image or retrieval question to introduce network types; data-transfer speed and volume.

Introduce 8 minutes

Teach network types; data-transfer speed and volume from printed pages 66-72; include the relevant definitions, diagrams and examples.

We do 10 minutes

Work through a textbook example or comparison for network types; data-transfer speed and volume; explain each decision and check understanding.

Support: Provide labelled diagrams, vocabulary, a structured response frame and a worked example. Apply agreed access arrangements during independent assessment without supplying answers.

Extension: Justify an alternative solution, explain a limitation or apply the same concept to a new scenario using evidence.

Materials

Teacher computer and display

School-approved applications, class save folder and fictional scenarios

Relevant textbook diagrams, activities and chapter questions

Student notebooks and a teacher assessment checklist

Teacher reflection

What worked well? _____

What needs reteaching or adjustment? _____
