LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will demonstrate the knowledge and practical skills taught in Unit 1: bits, bytes, unsigned binary conversion, addition, overflow and data representation. The two lessons provide independent school assessment tasks and opportunities to show a practical skill and explain a choice.

End-of-Week Assessment/Check: How will you know they got it?

Assess the prepared knowledge and practical tasks against the taught outcomes. Record correct responses, independent actions, explanations and any access support provided. Use the results to identify specific skills for follow-up.

LESSON SLOTS - MONDAY AND TUESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	12 October 2026	By the end of this lesson, students will be able to complete an independent school assessment of binary and digital data.	**H:** Welcome pupils calmly and check that the prepared papers, source cards or saved files are ready. **ID:** Explain the familiar task format, criteria and agreed access arrangements; pupils work independently. **WD:** Demonstrate only how to record or save an answer using an unrelated example; do not rehearse assessed content. **YD:** Pupils convert unsigned values, add with carries and explain overflow, character codes, pixels and sound samples. Collect evidence and record any technical or access support. **C:** Check that evidence is saved or collected, record independence against the criteria and identify outcomes for later feedback.	**Support:** Apply the school's agreed access arrangements. Read task instructions without giving content answers and record any assistance. **Extension:** Use the planned independent reasoning question after the core tasks; do not introduce new content during assessment.
2	13	By the end of this lesson,	**H:** Welcome pupils calmly	**Support:** Apply the school's

MATERIALS NEEDED FOR THE WEEK

- Oxford International Lower Secondary Computing Student Book 7 printed pages 4-31
- Teacher computer and display
- Classroom computers or laptops and the class save folder
- Prepared school assessment tasks covering the stated outcomes
- Whiteboard and markers
- Student notebooks, pencils and task sheets
- Teacher observation checklist and school access arrangements

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
