LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to explain why websites collect data and distinguish useful cookie functions from privacy concerns. They will also learn to recognise common online threats and choose a safe response to a suspicious message. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check one useful cookie purpose, one privacy concern and a justified decision about unnecessary information. Check a warning sign, a suitable response and an explanation of why an apparently familiar sender may still need checking. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND TUESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	26 October 2026	By the end of this lesson, students will be able to explain why websites collect data and distinguish useful cookie functions from privacy concerns.	**H:** Show a fictional registration form requesting more information than its task needs. **ID:** Introduce Unit 2 Staying safe online. Explain essential functions, preferences and tracking; discuss minimising shared data and asking a trusted adult. **WD:** Compare a shopping-basket cookie with advertising tracking and show that HTTPS protects a connection but does not prove a site is trustworthy. **YD:** Pupils annotate a fictional form and sort cookie-use scenarios by purpose, benefit and privacy concern; enter no real personal data. **C:** Check one useful cookie purpose, one privacy concern and a justified decision about	**Support:** Use fictional scenarios and teacher-approved sources. Provide a vocabulary bank, a reporting checklist and a citation frame; avoid personal disclosures. **Extension:** Ask pupils to justify an action for a less obvious scenario or improve a source record, explaining the privacy, safety or licence reason.

			unnecessary information.	
2	27 October 2026	By the end of this lesson, students will be able to recognise common online threats and choose a safe response to a suspicious message.	**H:** Show a printed fictional prize message with urgent wording and an unfamiliar link. **ID:** Explain phishing, identity theft, scams and malware using simple examples; distinguish authorised security testing from unauthorised access. **WD:** Annotate warning signs, avoid the link and model checking through a trusted route and reporting to the teacher. **YD:** Pairs analyse fictional messages and match malware examples to possible harm, then write a stop-and-report response. **C:** Check a warning sign, a suitable response and an explanation of why an apparently familiar sender may still need checking.	**Support:** Use fictional scenarios and teacher-approved sources. Provide a vocabulary bank, a reporting checklist and a citation frame; avoid personal disclosures. **Extension:** Ask pupils to justify an action for a less obvious scenario or improve a source record, explaining the privacy, safety or licence reason.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Lower Secondary Computing Student Book 7 printed pages 32-41
- Teacher computer and display
- Classroom computers or laptops and the class save folder
- Fictional online-safety scenarios, approved source cards and citation frames
- Whiteboard and markers
- Approved image pack with permission details and source-credit records
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
