LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to explain how protective software, updates and careful behaviour reduce online risks. They will also learn to recognise cyberbullying and explain supportive actions and the school reporting route. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the purpose of updates and protective software and an action that preserves school controls and protects login details. Check a practical reporting step, a supportive bystander response and a respectful explanation of why the behaviour is harmful. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND TUESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	2 November 2026	By the end of this lesson, students will be able to explain how protective software, updates and careful behaviour reduce online risks.	**H:** Compare a genuine school update notice with a fake browser warning offering a download. **ID:** Explain school-managed malware protection, firewall rules, updates and backups; no tool guarantees safety. Review strong unique passphrases and two-step verification. **WD:** Model reporting a suspicious warning and asking school staff to manage updates; do not install software or alter protection settings. **YD:** Pupils create a short protection checklist and choose an action for three fictional download, update or login scenarios. **C:** Check the purpose of updates and protective software and an action that preserves school controls and protects login details.	**Support:** Use fictional scenarios and teacher-approved sources. Provide a vocabulary bank, a reporting checklist and a citation frame; avoid personal disclosures. **Extension:** Ask pupils to justify an action for a less obvious scenario or improve a source record, explaining the privacy, safety or licence reason.

2	3 November 2026	By the end of this lesson, students will be able to recognise cyberbullying and explain supportive actions and the school reporting route.	**H:** Read a fictional group-chat scenario without using real pupil names. **ID:** Explain harmful messages, impersonation and exclusion; make clear the targeted person is not to blame and personal disclosure is not required. **WD:** Model telling a trusted adult promptly, keeping ordinary message evidence safely and using block or report tools with adult help. **YD:** Pairs create an advice card for a target and a bystander: do not retaliate, like or share harmful posts; seek help and offer support. **C:** Check a practical reporting step, a supportive bystander response and a respectful explanation of why the behaviour is harmful.	**Support:** Use fictional scenarios and teacher-approved sources. Provide a vocabulary bank, a reporting checklist and a citation frame; avoid personal disclosures. **Extension:** Ask pupils to justify an action for a less obvious scenario or improve a source record, explaining the privacy, safety or licence reason.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Lower Secondary Computing Student Book 7 printed pages 42-49
- Teacher computer and display
- Classroom computers or laptops and the class save folder
- Fictional online-safety scenarios, approved source cards and citation frames
- Whiteboard and markers
- Approved image pack with permission details and source-credit records
- Teacher reference: https://www.ncsc.gov.uk/collection/top-tips-for-staying-secure-online

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
