

Teacher:	Ray Joshua Balingkit	**Subject:**	Media Studies
Week:	1 (Term 1)	**Year:**	10–11
Link:		**Cover:**	

LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will begin the course by establishing respectful discussion and practical production routines. They will identify media forms, purposes and audiences and learn to support audience claims with observable evidence. Students will then analyse how visual and written choices create meaning, distinguishing description from interpretation and recognising that the same text can be read differently by different viewers.

End-of-Week Assessment/Check: How will you know they got it?

Teacher questioning, class discussion, analysis of worked examples and the completed independent activities. Check that students use accurate terminology, select specific evidence and explain how a choice creates meaning or addresses an audience. Review the written, visual or practical work alongside its annotations, and use the final checks in both lessons to identify the next skill requiring practice.

LESSON SLOTS - TUESDAY AND FRIDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	25 August 2026	By the end of this lesson, students will be able to explain classroom production routines and identify how media products address particular audiences.	**H:** Display a film still, a magazine cover and a television opening. Ask students who might use each product and what evidence supports their suggestion. Invite different interpretations before introducing the course vocabulary. **ID:** Introduce a media text as a constructed product that communicates meaning to an audience. Explain the distinction between describing a product and analysing how it addresses viewers. Establish equipment care, organised file naming, respectful discussion and permission before photographing or recording someone. **WD:** Use a teacher-prepared school-club announcement to identify its producer, intended audience and purpose. Model how a particular image or phrase offers	**Support:** Provide an audience table with form, purpose, audience and evidence headings. Model the first entry and offer vocabulary prompts. Let students rehearse an explanation with a partner before writing it, while checking that both students contribute. **Extension:** Students identify a possible secondary audience and explain how the same product could appeal differently to two groups. Ask them what further evidence would be needed to confirm an audience claim.

			evidence of audience appeal. Demonstrate saving the analysis in the class folder and explain how production roles help a group work efficiently. **YD:** Students classify three selected media products by form, purpose and likely audience, giving one observable reason for each choice. Pairs then agree production routines for a small classroom task, identify their responsibilities and save their completed audience table using the agreed filename. **C:** Ask students to distinguish an audience inference from an unsupported guess. Check the saved table and invite each pair to explain one routine that protects equipment, respects participants or makes their production work easier to manage.	
2	28 August 2026	By the end of this lesson, students will be able to analyse how visual and written choices in a media text create meaning for an audience.	**H:** Show a still image with its caption hidden, then reveal the caption. Ask whether the suggested meaning changes and which detail led students to revise their first interpretation. **ID:** Introduce media language through image, colour, setting, costume and written language. Explain the difference between what is directly visible and what an image may suggest. Emphasise that interpretations need evidence and that different audiences may respond differently to the same detail. **WD:** Annotate a fictional school-event image together. Describe the foreground subject and the accompanying words before explaining how	**Support:** Provide a description-and-interpretation grid and sentence starters such as “The image shows…” and “This may suggest…”. Model one complete connection before students analyse a different feature independently. **Extension:** Students explain how a different caption or crop could change the meaning while retaining the original image. They justify an alternative audience reading using a specific visual detail.

			framing and caption direct attention. Model a paragraph that connects a specific feature, a suggested meaning and a possible audience response without claiming that every viewer reacts identically. **YD:** Students annotate a second teacher-selected image and write a short analysis of two choices. They exchange work with a partner who underlines the evidence and checks whether the suggested meaning follows from it. Students revise one unsupported or overly general statement. **C:** Invite two interpretations of the same image and compare their evidence. Collect the annotated text and check that students explain how a feature creates meaning rather than only listing colours, objects or personal preferences.

MATERIALS NEEDED FOR THE WEEK

- GCSE Media Studies for AQA (Heinemann): Introduction; Unit 1 Film: audience and media language
- Teacher computer, display screen and speakers where audio is used
- Age-appropriate teacher-selected extracts or teacher-prepared fictional media texts
- Prepared analysis worksheet, evidence grid or production brief
- Paper, pencils, storyboard or design templates, and whiteboard markers
- Classroom computers and save folders; camera or approved image bank when required
- Lesson success criteria and teacher observation checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
