LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will examine how narrative structure organises a story and creates audience interest. They will apply the book's narrative-stage model to a short example, identifying a disruption and the attempts to resolve it. Students will then plan an original short narrative as a storyboard, using ordered images and production notes to make its events understandable to another person.

End-of-Week Assessment/Check: How will you know they got it?

Teacher questioning, class discussion, analysis of worked examples and the completed independent activities. Check that students use accurate terminology, select specific evidence and explain how a choice creates meaning or addresses an audience. Review the written, visual or practical work alongside its annotations, and use the final checks in both lessons to identify the next skill requiring practice.

LESSON SLOTS - TUESDAY AND FRIDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	8 September 2026	By the end of this lesson, students will be able to explain narrative structure and identify how a disruption and its resolution organise a story.	**H:** Tell a brief fictional story about a lost school key and stop before the ending. Ask what information students already know, what problem has appeared and what questions they expect the ending to answer. **ID:** Introduce the book's account of Todorov's narrative stages: equilibrium, disruption, recognition, attempted repair and a new equilibrium. Explain that the model is a way to analyse many stories rather than a rule followed by every text. Distinguish the order of events from the way a story presents them. **WD:** Map the lost-key story onto the stages. Identify the moment when the problem becomes clear and explain how attempts to solve it move the narrative forward.	**Support:** Provide the stages on separate cards and a simplified synopsis. Model the first two matches and use prompts asking what changes, who notices it and what action follows. Accept an oral explanation before the written response. **Extension:** Students explain how a flashback or an unresolved ending could alter the audience's experience. They distinguish changing the presentation order from changing the underlying sequence of events.

			Discuss how the ending changes the opening situation and demonstrate why a stage may occupy more than one scene. **YD:** Students analyse a short teacher-selected narrative or synopsis using a stage-and-evidence table. They identify the central problem, support each stage with an event and discuss any point that does not fit neatly. Each student writes an explanation of how the disruption creates audience interest. **C:** Ask students to distinguish recognition of a problem from an attempt to repair it. Check that their examples are actual story events and that they can explain how the ending relates to the opening.	
2	11 Septemb er 2026	By the end of this lesson, students will be able to storyboard a short narrative using a clear sequence of images and production notes.	**H:** Show a short written synopsis beside an unlabelled set of storyboard frames. Ask what the frames make clear and what a camera crew would still need to know before producing the sequence. **ID:** Explain the storyboard as a planning tool that turns a narrative into a sequence of shots. Introduce frame numbering, a simple sketch, action, dialogue or sound notes and a description of what the audience needs to see. Emphasise clear communication rather than artistic drawing skill. **WD:** Storyboard the opening of a fictional lost-property story. Model how one action can require more than one frame and how a reaction image helps explain a	**Support:** Provide a six-frame template and a simple scenario with the opening already suggested. Encourage stick figures and labelled objects. Use sequencing cards to help students establish the narrative before drawing and annotating their own frames. **Extension:** Students create an alternative opening or ending and explain how it changes audience knowledge or suspense. They justify any deliberate gap between frames instead of leaving an accidental break in the story.

			character's response. Add notes showing the intended order and discuss whether a viewer could follow the story without a spoken explanation. **YD:** Students plan a six-frame narrative with an opening situation, a disruption and a plausible resolution. They add concise action and sound notes to each frame. A partner follows the storyboard without hearing the synopsis and identifies a point needing clarification before students revise the plan. **C:** Ask students to explain how two adjoining frames connect. Check that the sequence can be followed, the central problem is visible and the ending addresses it. Collect the storyboard and note any missing information for later shot-planning work.

MATERIALS NEEDED FOR THE WEEK

- GCSE Media Studies for AQA (Heinemann): Unit 1 Film: Looking at narratives; Unit 9: Storyboarding
- Teacher computer, display screen and speakers where audio is used
- Age-appropriate teacher-selected extracts or teacher-prepared fictional media texts
- Prepared analysis worksheet, evidence grid or production brief
- Paper, pencils, storyboard or design templates, and whiteboard markers
- Classroom computers and save folders; camera or approved image bank when required
- Lesson success criteria and teacher observation checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
