LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will develop their understanding of representation as a constructed portrayal based on selection and emphasis. They will identify how appearance, dialogue, action and viewpoint can simplify or complicate a character and examine how stereotyping operates. Students will then support an interpretation with specific evidence, revise unsupported generalisations and consider a plausible alternative reading without endorsing the stereotype being discussed.

End-of-Week Assessment/Check: How will you know they got it?

Teacher questioning, class discussion, analysis of worked examples and the completed independent activities. Check that students use accurate terminology, select specific evidence and explain how a choice creates meaning or addresses an audience. Review the written, visual or practical work alongside its annotations, and use the final checks in both lessons to identify the next skill requiring practice.

LESSON SLOTS - TUESDAY AND FRIDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	29 September 2026	By the end of this lesson, students will be able to explain representation and identify how stereotyping can simplify the portrayal of people or groups.	**H:** Show two teacher-created descriptions of the same fictional character, each selecting different details. Ask what impression each description creates and which information has been left out. **ID:** Explain representation as the constructed portrayal of people, places or ideas through selected details. Introduce a stereotype as a simplified, repeated set of characteristics associated with a group. Distinguish analysing a portrayal from accepting it as true, and establish respectful language when discussing identity or difference. **WD:** Analyse a fictional adult character in a school-based scene through costume, dialogue, action and camera treatment. Identify what the text encourages	**Support:** Provide a representation grid covering appearance, dialogue, actions and viewpoint. Use fictional examples with a small number of clear details. Offer sentence stems that describe how the text presents a character without endorsing a stereotype. **Extension:** Students explain how a stereotype could be challenged or used ironically and what evidence would support that reading. They consider whose perspective receives attention and whose is missing.

			viewers to notice and what remains unknown. Compare a simplified portrayal with a version that offers the character more agency or complexity. **YD:** Students annotate two selected fictional character portrayals and identify the choices shaping each impression. They explain whether a portrayal relies on a stereotype and suggest one additional detail that would complicate it. Their response must describe the text without turning a generalisation into a claim about real people. **C:** Ask students to explain the difference between a representation and the person or group represented. Check that they refer to selected features and recognise an omission or limitation in the portrayal.	
2	2 October 2026	By the end of this lesson, students will be able to support an interpretation of representation with specific evidence and a reasoned explanation.	**H:** Present two claims about a fictional character: one supported by a quoted action or visual detail and one based on a personal assumption. Ask students which can be defended from the text and why. **ID:** Explain the relationship between an interpretive claim, precise textual evidence and a reasoned explanation. Discuss alternative readings and the need to distinguish a character's behaviour from assumptions about a wider group. Encourage students to qualify claims where the extract gives limited information. **WD:** Model a paragraph about a character who is first shown in isolation and later helps another	**Support:** Provide an evidence bank and a claim-evidence-explanation paragraph frame. Model how to choose a relevant detail rather than copying every observation. Allow oral discussion before students produce their independent response. **Extension:** Students evaluate two competing interpretations using evidence that supports or weakens each. They explain how the limited viewpoint of an extract affects the confidence of their judgement.

			person. Explain how framing and action support a changing impression. Compare a persuasive interpretation with one that ignores contradictory evidence and show how the claim can be revised. **YD:** Students write two evidence-based paragraphs about a teacher-selected portrayal. They use at least one visual detail and one action or line of dialogue. Partners check whether the evidence actually supports the claim, then students revise an overstatement and acknowledge a plausible alternative interpretation. **C:** Ask students to identify the strongest evidence in their response and explain its significance. Check that the analysis is about how the portrayal is constructed and that an alternative reading is considered where appropriate.

MATERIALS NEEDED FOR THE WEEK

- GCSE Media Studies for AQA (Heinemann): Unit 1 Film and Unit 2 Television: representation and audience positioning
- Teacher computer, display screen and speakers where audio is used
- Age-appropriate teacher-selected extracts or teacher-prepared fictional media texts
- Prepared analysis worksheet, evidence grid or production brief
- Paper, pencils, storyboard or design templates, and whiteboard markers
- Classroom computers and save folders; camera or approved image bank when required
- Lesson success criteria and teacher observation checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
