LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will complete a mock examination on the topics already taught. In the following lesson, they will review their answers, discuss common mistakes and practise the ideas or skills that need further support.

End-of-Week Assessment/Check: How will you know they got it?

Compare the mock responses with the corrections and parallel tasks in the following lesson. Record which ideas are secure and which require further support.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	23 November 2026	By the end of this lesson, students will be able to demonstrate the taught knowledge and skills in a short practice assessment.	**H:** Remind pupils which Units 1 and 2 topics have been taught and explain that this is practice. **ID:** Explain the response types and classroom routines. Use the prepared Term 1 reference; do not introduce new topics. **WD:** Model how to record or demonstrate an answer using an unrelated example so that the assessment questions remain independent. **YD:** Pupils complete individual oral, picture or practical tasks: identify a computer use, follow a prepared link and respond safely to a fictional online scenario. Teacher records observed strengths and misconceptions. **C:** Collect the work and explain that the next lesson will review it. Note which tasks need reteaching.	**Support:** Read instructions aloud, provide agreed access arrangements and accept oral or pointing responses where appropriate without supplying answers. **Extension:** Ask pupils who finish to check their responses and explain a taught example when invited; do not add untaught content.
2	26 November 2026	By the end of this lesson, students will be able to correct an error and	**H:** Show an anonymous example of a common error from the previous	**Support:** Reteach with pictures, concrete equipment or a partially completed

		explain an improved response from the mock examination.	lesson. **ID:** Revisit the relevant Units 1 and 2 ideas using the weekly reference and prepared resources. **WD:** Model checking one response and explaining why the improved answer fits the evidence. **YD:** Pupils revisit their own mock responses, practise the difficult skill with support and complete a parallel check task. **C:** Compare the revised response with the mock evidence and record any remaining support needs.	example. Let pupils explain orally before writing. **Extension:** Invite pupils to justify an improved answer and help create a further example using only taught ideas.

MATERIALS NEEDED FOR THE WEEK

- Y1 Computing T1 W14 Lesson Reference.pdf
- Student Book 1 printed pages 4-35
- Whiteboard and markers
- Prepared pictures or task cards
- Classroom computers or laptops
- Drawing paper or activity sheets
- Pencils and colouring materials; Student notebooks

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
