LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to identify mouse and keyboard actions as inputs that control a prepared program. They will also learn to identify a visible output and an audible output from a program. Through class discussion, teacher demonstrations and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the specific outcomes in each lesson row and note pupils who need further practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	18 January 2027	By the end of this lesson, students will be able to identify mouse and keyboard actions as inputs that control a prepared program.	**H:** Move the mouse and ask what changes on the screen. **ID:** Use pages 42-43 to introduce input. Prepare the book-equivalent mouse-following project before class. **WD:** Demonstrate moving the pointer and a prepared key event, naming the action made by the user. **YD:** Pupils test the two inputs, take turns controlling the program and draw the mouse and keyboard as input devices. **C:** Each pupil names an input and demonstrates the action it sends.	**Support:** Use pictures, adult reading and a paired demonstration. Accept pointing or an oral response before writing. **Extension:** Ask pupils to explain their choice and give another appropriate example.
2	21 January 2027	By the end of this lesson, students will be able to identify a visible output and an audible output from a program.	**H:** Run the prepared project with sound low and ask what pupils can see and hear. **ID:** Use pages 44-45 to explain that output is information produced by the computer, including movement, pictures and	**Support:** Use pictures, adult reading and a paired demonstration. Accept pointing or an oral response before writing. **Extension:** Ask pupils to explain their choice and give another appropriate example.

			sound. **WD:** Compare a sprite movement with a sound, then repeat the same input so pupils can describe its outputs. **YD:** Partners record one output they see and one they hear through drawing, pointing or dictated words. **C:** Ask pupils to distinguish their input action from the program's output.

MATERIALS NEEDED FOR THE WEEK

- Y1 Computing T2 W03 Lesson Reference.pdf
- Student Book 1 printed pages 42-45
- Scratch 3 and school-approved saving arrangements
- Teacher-prepared book-equivalent project; preview controls before class
- Classroom computers or laptops
- Drawing paper or activity sheets
- Pencils and colouring materials; Student notebooks

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
