LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to match a user action to a visible or audible program response. They will also learn to control a prepared game using mouse and keyboard inputs and describe its feedback. Through class discussion, teacher demonstrations and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the specific outcomes in each lesson row and note pupils who need further practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	25 January 2027	By the end of this lesson, students will be able to match a user action to a visible or audible program response.	**H:** Recall the mouse-following program and ask what the user does first. **ID:** Use pages 46-47 to compare input and output in the same example. **WD:** Draw a simple action-response pair: move the mouse, then the sprite moves. **YD:** Pupils match input and output cards, then demonstrate one pair using the prepared program. **C:** Check one correct input-output explanation from each pupil.	**Support:** Use pictures, adult reading and a paired demonstration. Accept pointing or an oral response before writing. **Extension:** Ask pupils to explain their choice and give another appropriate example.
2	28 January 2027	By the end of this lesson, students will be able to control a prepared game using mouse and keyboard inputs and describe its feedback.	**H:** Show the cat and hedgehog and ask why the player should avoid a collision. **ID:** Use pages 48-49 and the prepared book-equivalent project. Explain the controls and goal before playing; this is a guided use lesson, not independent coding of the	**Support:** Use pictures, adult reading and a paired demonstration. Accept pointing or an oral response before writing. **Extension:** Ask pupils to explain their choice and give another appropriate example.

			whole game. **WD:** Demonstrate the project's actual start control, hedgehog movement and mouse control. Show the collision feedback. **YD:** Pairs alternate playing and observing. They describe the input used and the output when the cat touches the hedgehog. **C:** Observe control of the game and ask pupils to explain the collision response.

MATERIALS NEEDED FOR THE WEEK

- Y1 Computing T2 W04 Lesson Reference.pdf
- Student Book 1 printed pages 46-49
- Scratch 3 and school-approved saving arrangements
- Teacher-prepared book-equivalent project; preview controls before class
- Classroom computers or laptops
- Drawing paper or activity sheets
- Pencils and colouring materials; Student notebooks

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
