4.4 Extra sprites

In this lesson

You will learn:

➔ to add an extra sprite to a program.

You have seen this program before. It is called the Hedgehog Game. Scratch must dodge the hedgehog.

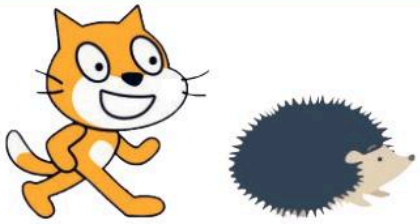

Scratch is a sprite. The program makes the sprite move.

Press the space bar to start the game.

There are two sprites in this game. Now you will add an extra hedgehog to the game.

Be creative

Draw a picture of Scratch and the hedgehogs.

Activity

You will add another hedgehog to the game.

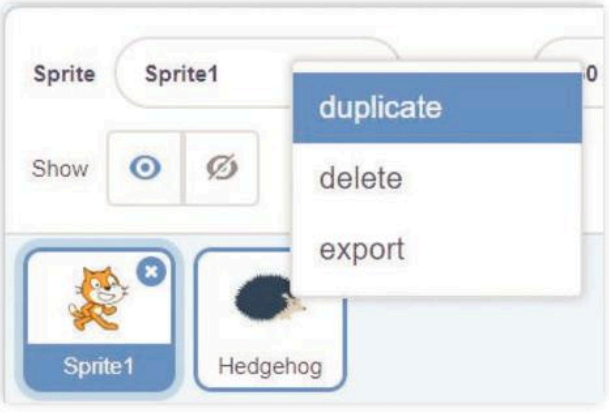

This part of the screen shows the sprites.

Move the pointer to the hedgehog.

Right-click the mouse. Right-click means to click the right button on the mouse.

You will see this menu.

Choose **duplicate**. Duplicate means to make two.

Click anywhere on the screen, then press the space bar to start the game. Now there are two hedgehogs.

Extra challenge

Can you add more hedgehogs to the game? Don't make it too hard for Scratch!

Think again

A classmate wants to make a copy of a sprite. Tell her how to do it.

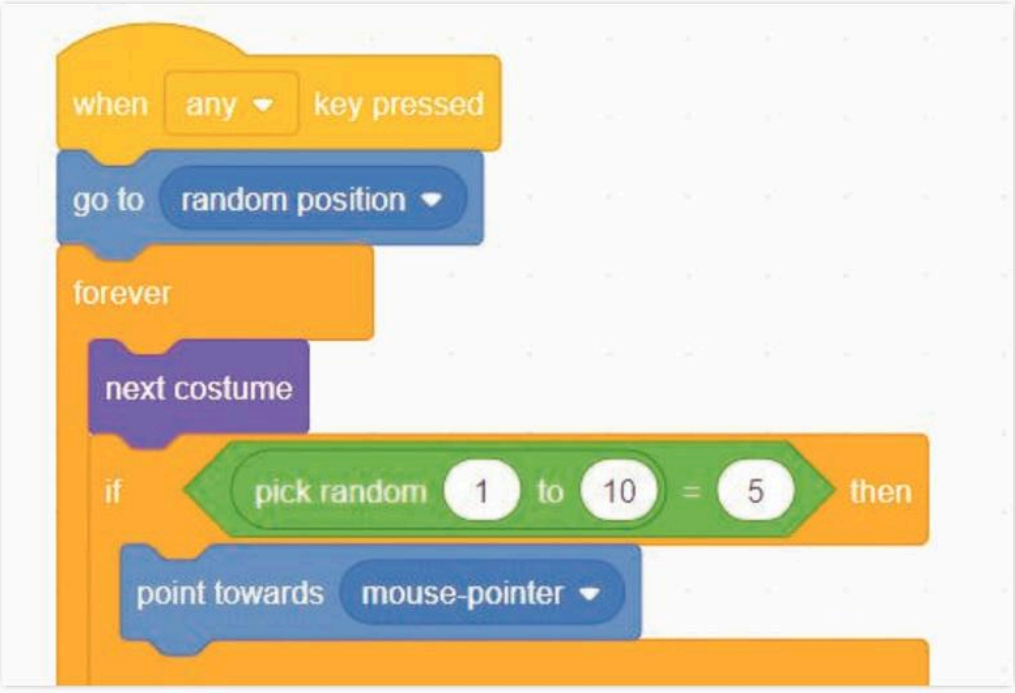

4.5 Find a new block

In this lesson

You will learn:

- how to find the block you want.

The program looks like this. The program will start when you press any key.

The first block is a start block.

Now you will change the start block. You will change the start block to the green flag block.

New blocks are stored on the left of the screen.

Extra challenge

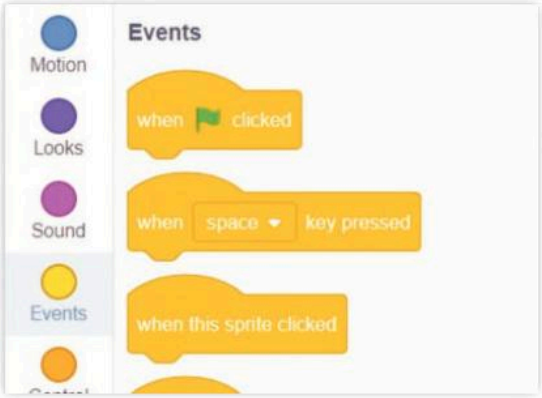

Click on the hedgehog sprite. Change the start block for the hedgehog.

Think again

Say the different ways you can start the game.

Activity

On the left are coloured dots. Click on the yellow dot.

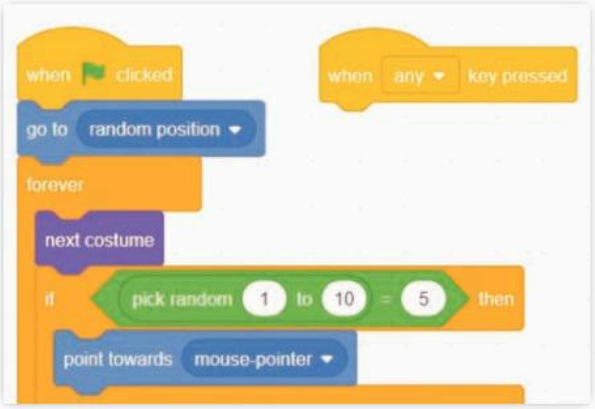

There are lots of start blocks. Find the green flag block.

Drag the block to the program. Drag means to hold down the mouse button and move the mouse.

Pull the program blocks away from the old start block. Fit the program to the green flag block.

Play the game. The green flag will start the game.
