LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to change a say-block message and test the program's visible feedback. They will also learn to make and explain a small change to a prepared Scratch program. Through class discussion, teacher demonstrations and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the specific outcomes in each lesson row and note pupils who need further practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	29 March 2027	By the end of this lesson, students will be able to change a say-block message and test the program's visible feedback.	**H:** Run the prepared collision response and ask which words appear. **ID:** Use pages 64-65 to introduce changing the text inside a say block. The teacher supplies the collision-check code. **WD:** Select the correct sprite, replace Ouch with another suitable short message and test a collision. **YD:** Pupils change the message, read it to a partner and check that it appears at the intended moment. **C:** Ask pupils to identify the edited block and explain when the message appears.	**Support:** Use pictures, adult reading and a paired demonstration. Accept pointing or an oral response before writing. **Extension:** Ask pupils to explain their choice and give another appropriate example.
2	1 April 2027	By the end of this lesson, students will be able to make and explain a small change to a prepared Scratch program.	**H:** Ask pupils which change they most enjoyed making this term. **ID:** Use pages 66-67 to explain a bounded practical check: change one event, costume or message.	**Support:** Use pictures, adult reading and a paired demonstration. Accept pointing or an oral response before writing. **Extension:** Ask pupils to explain their choice and give another appropriate example.

			WD: Model testing a changed script and reverting an unintended change. **YD:** Pupils choose one taught edit, save the project and demonstrate its effect to the teacher. **C:** Check the edited block, working output and pupil explanation. Topic 4.6 is assessed here after it has been taught.

MATERIALS NEEDED FOR THE WEEK

- Y1 Computing T2 W13 Lesson Reference.pdf
- Student Book 1 printed pages 64-67
- Scratch 3 and school-approved saving arrangements
- Teacher-prepared book-equivalent project; preview controls before class
- Classroom computers or laptops
- Drawing paper or activity sheets
- Pencils and colouring materials; Student notebooks

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
