# Game 2 Find the Hidden Animal

Term 3 | Week 2 | Pupil guide with teacher support

## What you will make

Read the clue, click the hidden animal and make it appear somewhere else.

## Get ready

One animal sprite named HiddenAnimal and a detailed backdrop.

## Lesson 1 Start building

**1.** Create a new project. Choose an animal. Rename it **HiddenAnimal**.

**2.** Choose a detailed backdrop, such as a forest. Keep the animal visible: Size **35**, not hidden behind scenery.

**3.** Name the project **Y1 Game 2 Find the Hidden Animal**.

Save your project before moving on. Use your school account or File > Save to your computer.

# Build the scripts

Select the named sprite first. In the Code tab, join the blocks in the order shown. Each separate stack starts with its own yellow event block. The boxes below are block-order diagrams, not editor screenshots.

## HiddenAnimal - clue

- when green flag clicked
- show
- set size to (35) %
- go to (random position)
- say [Can you find the hidden animal?] for (3) seconds

## HiddenAnimal - found

- when this sprite clicked
- say [You found me!] for (1) seconds
- hide
- wait (1) seconds
- go to (random position)
- show

# Lesson 2 Finish and test

Finish any missing scripts. Press the green flag, then play with a partner. Take turns testing and explaining.

| Check | What should happen |
|---|---|
| Clue | Start the game and read the clue with your teacher. |
| Find | Click the animal. It disappears briefly, then reappears. |
| Fair game | Check it is large enough to find at each new position. |
| Restart | Stop while it is hidden. Start again. It must reappear. |

## Find and fix

If the animal stays invisible, add show at the end of the found script and after the green flag.

If it is too difficult to see, increase its size or choose a clearer backdrop.

## Explain your game

Point to the event that starts your code. Say what happens next. Show one thing you changed.

## Optional extra

Change the clue to describe your animal. Ask a partner whether the clue helps.

## Teacher support

Model one stack at a time. Supply prepared sprites or scripts when needed. Read the messages aloud and let pupils demonstrate their learning orally. Keep scores and timers optional.
