## LESSON OVERVIEW

### What should students know/do by the end of this week's lessons?

Students will learn to build the core of a small Scratch game with teacher support. They will also learn to test the game, correct a simple problem and explain how it works. Through class discussion, teacher demonstrations and practical activities, students will practise these skills and explain their ideas.

### End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the specific outcomes in each lesson row and note pupils who need further practice.

## LESSON SLOTS - MONDAY AND THURSDAY

| Lesson | Date | Learning Objective | The Lesson Flow | Differentiation |
|---|---|---|---|---|
| **1** | 26 April 2027 | By the end of this lesson, students will be able to build the core of a small Scratch game with teacher support. | **H:** Play the prepared Find the Hidden Animal example and ask pupils to describe its goal.<br><br>**ID:** Identify the sprite, backdrop and event needed. Explain that this is a small weekly project using familiar blocks; the teacher supplies additional scaffolding.<br><br>**WD:** Select a detailed backdrop and a visible animal. Model the clue and a click stack that hides briefly, changes position and shows again.<br><br>**YD:** Pupils follow Game 2 in the step-by-step guide, build the core interaction and save a named project without personal details.<br><br>**C:** Check that the animal can be found, clicked and seen again after a short delay. | **Support:** Provide a project with prepared sprites and the first event already placed. Model one stack at a time and let partners alternate roles.<br><br>**Extension:** Invite pupils to change a message or appearance while keeping the main interaction working. |
| **2** | 29 April 2027 | By the end of this lesson, students will be able to test the game, correct a simple problem and explain how it works. | **H:** Reopen the saved project and recall what already works.<br><br>**ID:** Explain the guide's | **Support:** Use a teacher checklist, adult reading and a prepared working comparison. Accept an oral explanation. |

| | | | | |
|---|---|---|---|---|
| | | | test checklist and the difference between a problem to fix and an optional extra feature.<br><br>**WD:** Test visibility after a catch and after restarting. Model adding show to the reset stack if the sprite stays hidden.<br><br>**YD:** Partners take turns playing and observing, record or explain one issue, make one improvement and save the finished project.<br><br>**C:** Each pupil points to a start event, describes the response and demonstrates the completed goal. | **Extension:** Add one suitable optional feature only after the core game passes its checks; scores and timers are not required. |

## MATERIALS NEEDED FOR THE WEEK

- Y1 Computing T3 W02 Game 2 Step by Step.pdf
- Teacher computer and display
- Scratch 3 and saved or prepared starting projects
- Game test checklist and teacher demonstration
- Classroom computers or laptops
- Drawing paper or activity sheets
- Pencils and colouring materials; Student notebooks

## END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
