LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to build the core of a small Scratch game with teacher support. They will also learn to test the game, correct a simple problem and explain how it works. Through class discussion, teacher demonstrations and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the specific outcomes in each lesson row and note pupils who need further practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	3 May 2027	By the end of this lesson, students will be able to build the core of a small Scratch game with teacher support.	**H:** Play the prepared Reach the Finish example and ask pupils to describe its goal. **ID:** Identify the sprite, backdrop and event needed. Explain that this is a small weekly project using familiar blocks; the teacher supplies additional scaffolding. **WD:** Create Player and Finish, name them correctly and model arrow-key events that change x or y by 10 or -10. **YD:** Pupils follow Game 3 in the step-by-step guide, build the core interaction and save a named project without personal details. **C:** Check that the player responds to the intended arrow keys. The teacher helps with the condition and sensing block.	**Support:** Provide a project with prepared sprites and the first event already placed. Model one stack at a time and let partners alternate roles. **Extension:** Invite pupils to change a message or appearance while keeping the main interaction working.
2	6 May 2027	By the end of this lesson, students will be able to test the game, correct a simple problem and	**H:** Reopen the saved project and recall what already works.	**Support:** Use a teacher checklist, adult reading and a prepared working comparison. Accept an oral explanation.

		explain how it works.	**ID:** Explain the guide's test checklist and the difference between a problem to fix and an optional extra feature. **WD:** Teacher supplies or models the finish-check loop from the guide. Test all directions, reaching Finish and restarting from the initial position. **YD:** Partners take turns playing and observing, record or explain one issue, make one improvement and save the finished project. **C:** Each pupil points to a start event, describes the response and demonstrates the completed goal.	**Extension:** Add one suitable optional feature only after the core game passes its checks; scores and timers are not required.

MATERIALS NEEDED FOR THE WEEK

- Y1 Computing T3 W03 Game 3 Step by Step.pdf
- Teacher computer and display
- Scratch 3 and saved or prepared starting projects
- Game test checklist and teacher demonstration
- Classroom computers or laptops
- Drawing paper or activity sheets
- Pencils and colouring materials; Student notebooks

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
