Game 4 Choose the Correct Answer

Term 3 | Week 4 | Pupil guide with teacher support

What you will make

Read one question and click the correct picture. A wrong choice gives helpful feedback.

Get ready

Three simple shape sprites named Triangle, Circle and Square. Teacher models the click-feedback scripts.

Lesson 1 Start building

1. Create a project. Use Paint to draw a triangle, a circle and a square as three separate sprites. Rename them **Triangle**, **Circle** and **Square**.

2. On the backdrop, use the Text tool to write: **Which shape has three sides?** Keep all shapes below the question.

3. Use similar shape sizes. Name the project **Y1 Game 4 Choose the Correct Answer**.

Save your project before moving on. Use your school account or File > Save to your computer.

Build the scripts

Select the named sprite first. In the Code tab, join the blocks in the order shown. Each separate stack starts with its own yellow event block. The boxes below are block-order diagrams, not editor screenshots.

Triangle - start

when green flag clicked
go to x: (-150) y: (-40)
show

Triangle - correct

when this sprite clicked
say [Correct! A triangle has three sides.] for (2) seconds

Circle - start

when green flag clicked
go to x: (0) y: (-40)
show

Circle - try again

when this sprite clicked
say [Try again. Count the sides.] for (2) seconds

Square - start

when green flag clicked
go to x: (150) y: (-40)
show

Square - try again

when this sprite clicked
say [Try again. Count the sides.] for (2) seconds

Lesson 2 Finish and test

Finish any missing scripts. Press the green flag, then play with a partner. Take turns testing and explaining.

Check	What should happen
Question	Read the question with your teacher and point to each shape.
Correct	Click Triangle. The correct-answer message appears.
Try again	Click Circle and Square. Both should invite another try.
Restart	Start again. All shapes return to their places.

Find and fix

If the wrong shape says Correct, select that sprite and replace its message.

If all scripts run on one sprite, move each script to the sprite named above it.

Explain your game

Point to the event that starts your code. Say what happens next. Show one thing you changed.

Optional extra

Change the question to Which shape has four sides? Then change which sprite gives the correct feedback. Explain that this is programmed feedback, not AI.

Teacher support

Model one stack at a time. Supply prepared sprites or scripts when needed. Read the messages aloud and let pupils demonstrate their learning orally. Keep scores and timers optional.
