LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to name a familiar task that an AI system can help with and explain that people make and check these systems. Through class discussion, teacher demonstrations and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the specific outcomes in each lesson row and note pupils who need further practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	17 May 2027	By the end of this lesson, students will be able to name a familiar task that an AI system can help with and explain that people make and check these systems.	**H:** Show a spoon, a toy car and a computer picture. Ask which things people made and what each helps us do. **ID:** Explain that AI means artificial intelligence. Some computer systems use patterns in examples to make a prediction, recognise something or suggest a response. A computer is not alive, and not every machine uses AI. **WD:** Use the reference cards to compare a teacher-described speech recogniser, an image recogniser and a simple on-off lamp. Explain the specific AI task; do not claim every phone, robot or toy has AI. **YD:** Partners choose one AI example, draw its job and complete the sentence “This system helps people to...” orally or in writing. Ask them to point to the information it needs, such as a picture or a spoken word.	**Support:** Use the labelled picture cards and read all text aloud. Accept pointing and oral answers. Model one sentence before partner discussion. **Extension:** Ask pupils to compare a machine with fixed on-off instructions and an AI example. Can both be helpful? Why does being a machine not automatically mean it uses AI?

			C: Invite pupils to describe one example. Check that they know people built the system and that its suggestion still needs checking.

MATERIALS NEEDED FOR THE WEEK

- Y1 Computing T3 W05 Lesson Reference.pdf
- Teacher computer and display
- Weekly AI pupil reference and teacher answers
- AI example cards and human-made objects
- Classroom computers or laptops
- Drawing paper or activity sheets
- Pencils and colouring materials; Sources: Day of AI, Code.org and UNICEF; links in the weekly reference

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
