LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to identify private information and show how to stop and ask a trusted adult before sharing information or following an uncertain suggestion. They will also learn to draw a proposed AI helper, explain its task and name one possible mistake and one safety rule. Through class discussion, teacher demonstrations and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the specific outcomes in each lesson row and note pupils who need further practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	7 June 2027	By the end of this lesson, students will be able to identify private information and show how to stop and ask a trusted adult before sharing information or following an uncertain suggestion.	**H:** Use a fictional character, Sam, who sees a box asking for a home address. Ask what Sam should do before typing anything. **ID:** Explain that home addresses, passwords, contact details and private photos should not be shared with a tool without adult permission. AI suggestions can be wrong. Teach “Stop, check, ask.” Use invented examples only. **WD:** Model two scenarios from the reference: a tool asks for a password, and a picture label gives a triangle four sides. Keep the information private in the first; check the visible evidence with an adult in the second. **YD:** Pairs role-play the four fictional scenarios. One pupil points to a response card; the other explains why. They practise naming a trusted adult and checking a simple claim with a book,	**Support:** Read each scenario aloud and offer two response cards. Let pupils rehearse the sentence “I will ask my teacher.” **Extension:** Ask pupils to explain why an answer that sounds confident should still be checked.

			real object or teacher. **C:** Each pupil explains one private item and demonstrates asking for help. Do not ask pupils to reveal actual addresses, passwords or family details.	
2	10 June 2027	By the end of this lesson, students will be able to draw a proposed AI helper, explain its task and name one possible mistake and one safety rule.	**H:** Recall the AI examples and safety rule. Ask what small problem a computer helper might help a person solve. **ID:** Explain that pupils are designing an idea on paper, not building or training an AI. Their helper needs a clear job, suitable information and a person to check its suggestion. **WD:** Model a toy-picture helper using the reference template: it looks at a toy picture and suggests a toy group. Show a blurry picture as a possible mistake and explain that a teacher checks the result. **YD:** Pupils draw their helper and complete the task, information, mistake and safety sections through pictures or dictated sentences. Partners ask “What could go wrong?” and help improve one part. **C:** Pupils present their design briefly. Check for a useful job, a possible mistake, a named adult checker and a privacy rule. Keep the completed page for the Week 9 review.	**Support:** Offer two suggested jobs, a partially completed example and adult scribing. Accept an oral explanation with a drawing. **Extension:** Ask pupils to show how a person could correct the helper’s mistake and which information it does not need.

MATERIALS NEEDED FOR THE WEEK

- Y1 Computing T3 W08 Lesson Reference.pdf
- Teacher computer and display
- Weekly AI pupil reference and teacher answers
- Fictional safety scenarios and AI Helper template
- Classroom computers or laptops
- Drawing paper or activity sheets
- Pencils and colouring materials; Sources: Day of AI, Code.org and UNICEF; links in the weekly reference

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
