Using AI safely

Term 3 | Week 8 | Lesson reference

STOP - CHECK - ASK

Stop before sharing private information.
Check a suggestion with a trusted adult.
Ask your teacher or parent when you are unsure.

Keep these private

Passwords, home addresses, phone numbers and private photos need protection. Do not type or upload them into a tool on your own.

A made-up example

Sam sees a box asking for a password. Sam closes the box and asks the teacher. We use an invented character; nobody needs to tell the class a real password.

Check the answer

A tool labels a triangle as a shape with four sides. Count the sides together. The tool is wrong. A confident answer still needs checking.

Scenario cards

Teacher reads each card aloud. Choose a response: STOP, CHECK or ASK. More than one response may help.

Fictional situation	What would you do?
1. A tool asks Sam for a home address.	
2. A tool says a triangle has four sides.	
3. A pop-up asks Lee to upload a family photo.	
4. A tool gives a confusing answer about a classroom animal.	

Practise saying

“I will ask my teacher.”
“We can count and check.”
“I will keep that information private.”

My AI Helper idea

Design an idea on paper. You are not building an AI system.

Draw and name your helper

Its job is _____

It needs this information _____

It might make this mistake _____

This adult will check _____

My safety rule is _____

Teacher example and answers

AI Helper example

Toy-picture helper: suggests a toy group from a picture of an object. A blurry picture might produce the wrong group. A teacher checks. It does not need a pupil name, address or face. This is an imagined design, not a promise that a working system exists.

Scenario answers

1. Stop and ask; do not enter an address. 2. Check by counting the sides with an adult. 3. Stop and ask; do not upload a private photo. 4. Ask a trusted adult and check an appropriate book or real observation. Accept a different safe explanation.

Success check

The pupil can name a private item, ask an adult for help and describe a helper's task, possible mistake and checker. Use oral responses or adult scribing when needed. These are introductory habits, not legal advice or an independent chatbot-use lesson.
