AI review reference

Term 3 | Week 9 | Use after the mock examination

Recall and explain

1. Name one job an AI system might help with.

2. Show a labelled example and explain its group.

3. What do we do if a suggestion is wrong?

4. Name one kind of information to keep private.

5. Who can help us check?

Use the earlier resources

Revisit the Week 5 examples, Week 6 shape cards and Week 8 scenarios. Let pupils improve their AI Helper page using feedback. Also revisit one saved Scratch game so pupils can demonstrate an event and an output.

Teacher guidance

Lesson 1 is the mock examination. Lesson 2 reviews only content already taught. Use short oral, pointing, sorting and practical responses. This file is a reference sheet, not the actual examination or a mark scheme.

Expected ideas

Examples include recognising a picture or suggesting spoken words. A label identifies a group. Predictions can be wrong, so a person checks. Keep passwords, contact details and private photos protected. A teacher or parent can help.
