LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to describe a network and explain why devices are connected. They will also learn to compare wired and wireless connections and use a login safely. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check one network benefit and the difference between a local and a wider network. Check a reason for each connection choice and a safe response to a request for a password. Note pupils who need further guided practice.

LESSON SLOTS - WEDNESDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	2 September 2026	By the end of this lesson, students will be able to describe a network and explain why devices are connected.	**H:** Ask how computers share a printer or class files. **ID:** Introduce Unit 1 Computer networks. Explain connected devices sharing data and resources. Compare a local area network with networks over wider areas. **WD:** Build a small diagram with computer, connection and printer cards. Explain that software and agreed rules help devices work together. **YD:** Pairs draw a classroom network and label two things it supports. Use a school example without accessing restricted equipment. **C:** Check one network benefit and the difference between a local and a wider network.	**Support:** Provide labelled network-device cards, a partly completed diagram and a short vocabulary bank. Use guided tracing and accept spoken explanations. **Extension:** Ask pupils to justify an alternative connection or diagram and explain a benefit and a limitation for the given task.
2	3 September	By the end of this lesson,	**H:** Show cable and	**Support:** Provide labelled

	2026	students will be able to compare wired and wireless connections and use a login safely.	access-point pictures and ask how they connect a computer. **ID:** Explain cable connections, Wi-Fi and access points. Follow school login rules and keep passwords private. **WD:** Trace wired and wireless paths. Discuss a long, unique passphrase using a fictional login; do not display or change real passwords. **YD:** Pupils choose connections for fixed and portable devices and solve fictional login-safety scenarios. Adults handle cables and settings. **C:** Check a reason for each connection choice and a safe response to a request for a password.	network-device cards, a partly completed diagram and a short vocabulary bank. Use guided tracing and accept spoken explanations. **Extension:** Ask pupils to justify an alternative connection or diagram and explain a benefit and a limitation for the given task.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 5 printed pages 4-9
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Network-device cards, connection diagrams and classroom scenario cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
