## LESSON OVERVIEW

### What should students know/do by the end of this week's lessons?

Students will learn to identify the roles of a server, switch, router and wireless access point. They will also learn to distinguish the internet from the web and name services that use the internet. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

### End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check that pupils link each device to its role and do not confuse the router with the internet itself. Ask pupils to explain the internet-web difference and give an example of an internet service besides the web. Note pupils who need further guided practice.

## LESSON SLOTS - WEDNESDAY AND THURSDAY

| Lesson | Date | Learning Objective | The Lesson Flow | Differentiation |
|---|---|---|---|---|
| 1 | 9 September 2026 | By the end of this lesson, students will be able to identify the roles of a server, switch, router and wireless access point. | **H:** Display a network diagram with four missing device labels.<br><br>**ID:** Explain a server providing a service, a switch linking local devices, a router connecting networks and an access point providing wireless access.<br><br>**WD:** Trace a print request from a computer across the local network to the print service and printer. Explain protocols as agreed communication rules.<br><br>**YD:** Pairs label a prepared diagram and use message cards to explain a file-sharing or printing route. Use pictures rather than opening equipment.<br><br>**C:** Check that pupils link each device to its role and do not confuse the router with the internet itself. | **Support:** Provide labelled network-device cards, a partly completed diagram and a short vocabulary bank. Use guided tracing and accept spoken explanations.<br><br>**Extension:** Ask pupils to justify an alternative connection or diagram and explain a benefit and a limitation for the given task. |
| 2 | 10 September 2026 | By the end of this lesson, students will be able to | **H:** Ask whether sending an email is the same | **Support:** Provide labelled network-device cards, a partly |

## MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 5 printed pages 10-13
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Network-device cards, connection diagrams and classroom scenario cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

## END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
