LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to explain how internet communication changes work and supports remote teamwork. They will also learn to explain an internet benefit and respond safely to misleading or upsetting communication. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check pupils connect a work task to a suitable service and explain why remote working does not suit every task. Ask pupils to explain a helpful internet use and name the safe next step and a trusted adult for an online concern. Note pupils who need further guided practice.

LESSON SLOTS - WEDNESDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	16 September 2026	By the end of this lesson, students will be able to explain how internet communication changes work and supports remote teamwork.	**H:** Compare a team meeting in one room with colleagues using a video call. **ID:** Explain remote work, shared documents and changing job skills. Some tasks can be remote while others need people or equipment in one place. **WD:** Compare a designer sharing a file with a worker repairing a machine. Identify what can be shared online and what needs physical presence. **YD:** Pairs plan how a fictional team could share a document and discuss one benefit, one difficulty and a useful communication rule. **C:** Check pupils connect a work task to a suitable service and explain why remote working does not suit every task.	**Support:** Provide labelled network-device cards, a partly completed diagram and a short vocabulary bank. Use guided tracing and accept spoken explanations. **Extension:** Ask pupils to justify an alternative connection or diagram and explain a benefit and a limitation for the given task.

2	17 September 2026	By the end of this lesson, students will be able to explain an internet benefit and respond safely to misleading or upsetting communication.	**H:** Show fictional examples of useful online information and a message pressuring someone to share private details. **ID:** Explain convenient access, communication and information alongside misleading content and unkind messages. Protect private details and seek trusted-adult help. **WD:** Model stopping, not replying or forwarding an upsetting message and reporting it through the school route. Use harmless scenario cards only. **YD:** Pupils choose a safe response to fictional situations and write advice for a friend. Balance one internet benefit with a sensible precaution. **C:** Ask pupils to explain a helpful internet use and name the safe next step and a trusted adult for an online concern.	**Support:** Provide labelled network-device cards, a partly completed diagram and a short vocabulary bank. Use guided tracing and accept spoken explanations. **Extension:** Ask pupils to justify an alternative connection or diagram and explain a benefit and a limitation for the given task.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 5 printed pages 14-17
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Network-device cards, connection diagrams and classroom scenario cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
