LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to draw and explain a small classroom network. They will also learn to choose and justify network connections for a classroom. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check connected paths, suitable labels and an explanation of what the network lets users share. Check reasons relate to the room or task and pupils identify a sensible login-safety rule. Note pupils who need further guided practice.

LESSON SLOTS - WEDNESDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	23 September 2026	By the end of this lesson, students will be able to draw and explain a small classroom network.	**H:** Display computer, printer, server, switch, router and access-point cards. **ID:** Explain the diagram task and revisit device roles. A shared local resource can work without the internet connection. **WD:** Model a different small network, label its connections and trace a request to a shared resource. **YD:** Pupils draw an agreed classroom network, label devices and connections and explain a file or printing route to a partner. **C:** Check connected paths, suitable labels and an explanation of what the network lets users share.	**Support:** Provide labelled network-device cards, a partly completed diagram and a short vocabulary bank. Use guided tracing and accept spoken explanations. **Extension:** Ask pupils to justify an alternative connection or diagram and explain a benefit and a limitation for the given task.
2	24 September 2026	By the end of this lesson, students will be able to choose and justify network connections for a classroom.	**H:** Offer a fixed desktop workstation and a portable tablet used around a room. **ID:** Review wired and	**Support:** Provide labelled network-device cards, a partly completed diagram and a short vocabulary bank. Use guided tracing and accept spoken explanations.

			wireless connections, mobility, shared resources and authorised access. Do not assume one connection is always best. **WD:** Think aloud about choosing connections for a computer corner and portable devices. Identify where an access point is needed. **YD:** Pairs annotate a classroom plan with suitable connections and explain two choices. Add a reminder about keeping login details private. **C:** Check reasons relate to the room or task and pupils identify a sensible login-safety rule.	**Extension:** Ask pupils to justify an alternative connection or diagram and explain a benefit and a limitation for the given task.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 5 printed pages 6-13
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Network-device cards, connection diagrams and classroom scenario cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
