LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to apply network vocabulary and device roles in a short learning check. They will also learn to correct a network misconception and apply it to a fresh diagram. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Record accurate labels, connected paths and task-based reasons. Select common gaps for feedback. Ask each pupil to explain a correction and demonstrate the same idea with a fresh example. Note pupils who need further guided practice.

LESSON SLOTS - WEDNESDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	30 September 2026	By the end of this lesson, students will be able to apply network vocabulary and device roles in a short learning check.	**H:** Revisit network, LAN, connection, server, switch, router, access point and internet. **ID:** Explain the familiar individual diagram and scenario tasks; pupils show their own understanding. **WD:** Model recording a reason using an unrelated example without providing answers to the check. **YD:** Pupils label a small network, choose a connection and explain an internet service and safe login behaviour. **C:** Record accurate labels, connected paths and task-based reasons. Select common gaps for feedback.	**Support:** Provide labelled network-device cards, a partly completed diagram and a short vocabulary bank. Use guided tracing and accept spoken explanations. **Extension:** Ask pupils to justify an alternative connection or diagram and explain a benefit and a limitation for the given task.
2	1 October 2026	By the end of this lesson, students will be able to correct a network misconception and apply it to a fresh diagram.	**H:** Show an anonymous diagram confusing a router and wireless access point. **ID:** Explain the common	**Support:** Provide labelled network-device cards, a partly completed diagram and a short vocabulary bank. Use guided tracing and accept spoken explanations.

			gaps from the check with a different network example. **WD:** Model correcting one device role and tracing a complete path to a shared resource. **YD:** Pupils improve their diagrams and answer a similar connection or internet-service scenario. Provide targeted guided practice where needed. **C:** Ask each pupil to explain a correction and demonstrate the same idea with a fresh example.	**Extension:** Ask pupils to justify an alternative connection or diagram and explain a benefit and a limitation for the given task.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 5 printed pages 4-19
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Network-device cards, connection diagrams and classroom scenario cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
