LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will practise the taught knowledge and skills in network purposes, wired and wireless connections, device roles, internet services and responsible network use. They will complete a mock assessment, review feedback and correct misunderstandings before assessment week.

End-of-Week Assessment/Check: How will you know they got it?

Compare each pupil's mock responses with their corrected work and a similar follow-up task. Check that pupils can explain a correction and apply it independently. Record outcomes needing another guided example.

LESSON SLOTS - WEDNESDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	7 October 2026	By the end of this lesson, students will be able to complete a mock assessment and identify a practice target in network purposes, wired and wireless connections, device roles, internet services and responsible network use.	**H:** Invite pupils to recall the recent unit using familiar network or web prompts. **ID:** Explain that the mock is practice covering only the taught outcomes. It helps us decide what to review. **WD:** Model the response format with an unrelated example, including how to give a useful reason. **YD:** Pupils complete the prepared mock tasks independently, then identify one secure skill and one practice target. **C:** Collect evidence and choose common gaps for review rather than moving to new content.	**Support:** Apply the school's agreed access arrangements. Read task instructions without supplying answers and record adult assistance. **Extension:** Ask pupils to explain why their correction works and create a similar example for a partner.
2	8 October 2026	By the end of this lesson, students will be able to correct a misconception and apply a taught skill in network purposes, wired and wireless connections, device roles, internet services	**H:** Show an anonymous response from the mock and ask for a helpful improvement. **ID:** Revisit the common gaps and explain the relevant idea using a fresh	**Support:** Apply the school's agreed access arrangements. Read task instructions without supplying answers and record adult assistance. **Extension:** Ask pupils to explain why their correction

		and responsible network use.	example. **WD:** Model improving one response, then check the same idea with a different network diagram or approved web scenario. **YD:** Pupils correct their work and complete a similar task. Provide a focused guided example for pupils with the same misconception. **C:** Ask pupils to explain their correction and check whether they can use the idea independently.	works and create a similar example for a partner.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 5 printed pages 4-19
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Prepared mock assessment tasks covering the taught outcomes
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- School access arrangements and the practical assessment checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
