LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to interpret a search result and distinguish an advertisement from a useful source. They will also learn to choose web content using authorship, date, relevance, reading level and evidence. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check pupils recognise a result's main parts, identify an advert and avoid treating the first result as automatically trustworthy. Ask pupils to justify a source choice and explain one limit or missing piece of information. Note pupils who need further guided practice.

LESSON SLOTS - WEDNESDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	4 November 2026	By the end of this lesson, students will be able to interpret a search result and distinguish an advertisement from a useful source.	**H:** Show a prepared results page containing an advert and two ordinary results. **ID:** Explain titles, web addresses and short descriptions. Results are ordered by search algorithms; a high position or advert does not prove accuracy. **WD:** Compare results against one research question, identify an advert label and explain why a suitable-looking page still needs checking. **YD:** Pairs annotate screened results and choose which approved page to examine first, giving a reason linked to the question. **C:** Check pupils recognise a result's main parts, identify an advert and avoid treating the first result as automatically trustworthy.	**Support:** Provide approved page screenshots, a source checklist and a credit-writing frame. Use short texts and model one step before independent practice. **Extension:** Ask pupils to compare two source choices or queries, explain a limitation and improve the evidence or credit in their work.

2	5 November 2026	By the end of this lesson, students will be able to choose web content using authorship, date, relevance, reading level and evidence.	**H:** Compare two harmless pages about the same topic, one with an unclear source. **ID:** Explain a short source checklist: who created it, when, whether it answers the question, whether it is understandable and whether claims can be checked. **WD:** Check an approved page and compare one factual claim with another dependable source. Distinguish a checkable fact from an opinion. **YD:** Pairs assess prepared pages, record evidence from the checklist and select a suitable source for a class research question. **C:** Ask pupils to justify a source choice and explain one limit or missing piece of information.	**Support:** Provide approved page screenshots, a source checklist and a credit-writing frame. Use short texts and model one step before independent practice. **Extension:** Ask pupils to compare two source choices or queries, explain a limitation and improve the evidence or credit in their work.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 5 printed pages 26-29
- Teacher computer and display
- Class computers with supervised browser access and the class save folder
- Approved web pages, search-result cards, an index model and fact-sheet template
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Source checklist, credit-writing frame and teacher-cleared image examples

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
