LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to explain how camera techniques position an audience, using accurate textbook terminology and a justified example. They will also learn to analyse shots and recognise intertextual references, using relevant evidence and clear explanations. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Teacher questioning, discussion, completed activities and the final checks in both lessons. Check accurate terminology, specific evidence and clear explanations of the weekly topics.

LESSON SLOTS - TUESDAY & FRIDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	15 September 2026	Lesson 1: Audience positioning and camera techniques By the end of this lesson, students will be able to explain how camera techniques position an audience.	**H:** Use a short example or retrieval question to activate prior knowledge of audience positioning and camera techniques. **ID:** Teach audience involvement, point of view, shot reverse shot and insert shots; how selected information directs attention. **WD:** Model one analysis or worked response. Identify a specific feature, explain its meaning and link it to audience or purpose. **YD:** Students annotate a short sequence to show what the viewer sees, knows and feels; justify two camera choices. Require evidence and explanations, then check responses with a partner. **C:** Students explain how one shot places the viewer in relation to a character. Use responses to identify misconceptions.	**Support:** Provide key vocabulary, a labelled example and a response frame. Break the task into steps and check understanding before independent work. **Extension:** Compare an alternative example or interpretation and justify how context changes the audience response.

2	18 September 2026	Lesson 2: Camera shots and intertextuality By the end of this lesson, students will be able to analyse shots and recognise intertextual references.	**H:** Use a short example or retrieval question to activate prior knowledge of camera shots and intertextuality. **ID:** Teach framing, shot distance and camera angle; intertextuality as a recognisable link to another text. **WD:** Model one analysis or worked response. Identify a specific feature, explain its meaning and link it to audience or purpose. **YD:** Students identify shots in a sequence and analyse a teacher-provided intertextual reference; explain the effect on an informed viewer. Require evidence and explanations, then check responses with a partner. **C:** Students distinguish a camera technique from an intertextual reference. Use responses to identify misconceptions.	**Support:** Provide key vocabulary, a labelled example and a response frame. Break the task into steps and check understanding before independent work. **Extension:** Compare an alternative example or interpretation and justify how context changes the audience response.

MATERIALS NEEDED FOR THE WEEK

- GCSE Media Studies for AQA (Heinemann, 2004), printed pages 22-25
- Teacher computer, display and speakers
- Age-appropriate teacher-selected media examples and class save folder
- Relevant textbook activities, analysis sheets and production briefs
- Student notebooks and a teacher assessment checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
