## LESSON OVERVIEW

### What should students know/do by the end of this week's lessons?

Students will learn to trace an algorithm and record changing values. They will also learn to identify and correct errors in an algorithm. Teacher demonstrations, guided examples and practical tasks will help students explain and apply these ideas.

### End-of-Week Assessment/Check: How will you know they got it?

Teacher questioning, class discussion, the completed textbook activities and the final checks in both lessons. Show the final values and explain which branch was followed. Explain one correction using the trace results. Review completed work and use the final checks to identify misconceptions.

## LESSON SLOTS - MONDAY & FRIDAY

| Lesson | Date | Learning Objective | The Lesson Flow | Differentiation |
|---|---|---|---|---|
| 1 | 31 August 2026 | By the end of this lesson, students will be able to trace an algorithm and record changing values. | **H:** Recall prior learning with a short question or prediction linked to the lesson topic.<br><br>**ID:** Model a trace table for a short sequence with a condition. Use textbook pages 4-11 and explain the relevant vocabulary.<br><br>**WD:** Complete a second example together. Ask students to explain each step and check for misconceptions.<br><br>**YD:** Complete trace tables for different inputs and predict the output. Record the solution and check it against the task requirements.<br><br>**C:** Show the final values and explain which branch was followed. | **Support:** Provide a vocabulary guide, a worked example and a partially completed task. Use prompts and paired rehearsal before independent work.<br><br>**Extension:** Apply the concept to a new example, justify the choices and explain a limitation or alternative solution. |

## MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE Computer Science Student Book, printed pages 4-11
- Teacher computer and classroom display
- Student notebooks, algorithm worksheets and drawing materials
- Relevant textbook examples, activities and questions

## END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
