LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will consolidate and demonstrate their understanding of taught problem-solving and programming topics, including readability and strings. They will use mock-assessment feedback to correct errors and improve explanations.

End-of-Week Assessment/Check: How will you know they got it?

Teacher questioning, class discussion, the completed textbook activities and the final checks in both lessons. Mark responses against the assessment criteria. Record misconceptions and plan focused follow-up activities.

LESSON SLOTS - MONDAY & FRIDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	23 Novembe r 2026	By the end of this lesson, students will be able to complete a mock assessment of taught problem-solving and programming topics, including readability and strings.	**H:** Explain the assessment instructions, timing and permitted materials. **ID:** Clarify the question format and success criteria without revealing answers. **WD:** For revision, discuss a similar example. During a formal assessment, use this time for independent responses. **YD:** Complete the mock questions independently and record reasoning. **C:** Collect work and record topics requiring follow-up; give individual feedback when marking is complete.	**Support:** Apply agreed access arrangements. Clarify instructions without supplying answers during independent assessment. **Extension:** Use remaining time to check reasoning, trace solutions and justify answers where requested.

MATERIALS NEEDED FOR THE WEEK

- Teacher-prepared mock assessment and feedback tasks
- Teacher computer and classroom display
- Student writing materials and approved assessment equipment

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
